

Datasheet for 010-001-310**rMouse IL-6 Protein****Overview**

Description:	IL-6 Mouse Recombinant Protein - 010-001-310
Item No.:	010-001-310
Size:	10 µg
Applications:	SDS-PAGE, IHC, WB
Origin:	Mouse
Expressed in:	E. coli

Product Details

Background:	Interleukin (IL)-6, also known as BCDG, BCGF and BSF-2, is an important proinflammatory and immunoregulatory cytokine expressed by various cells. Interleukin-6 has been shown to inhibit the growth of early stage and to promote the proliferation of advanced stage melanoma cells in vitro. Recombinant Mouse IL-6 produced in E. coli is a single, non-glycosylated polypeptide chain containing 187 amino acids and having a molecular mass of 21,709 Daltons.
Synonyms:	Interleukin-6 cytokine, IL-6, B-cell stimulatory factor 2, BSF-2, Interferon beta-2, IFN-beta-2, Hybridoma growth factor, CTL differentiation factor, CDF, Interleukin HP-1
Species of Origin:	Mouse
Expressed in:	E. coli
Type:	Recombinant Protein
Low Endotoxin:	Yes

Target Details

Gene Name:	Il6
Purity/Specificity:	Purity greater than 95% as determined by reducing and non-reducing SDS-PAGE.
Relevant Links:	• NCBI • UniProtKB - P08505

Application Details

Tested Applications:	SDS-PAGE
Suggested Applications:	IHC, WB (Based on references)
Application Note:	Interleukin-6 (IL-6) has been tested by SDS-PAGE and is suitable as a control for polyclonal or monoclonal anti-Interleukin-6 (IL-6) in immunological assays. It is recommended to reconstitute the lyophilized recombinant M-IL-6 in 10 mM HCl to 0.1-1.0 mg/mL to regain full activity; this can then be further diluted to other aqueous solutions.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
Other:	Biological Activity: Recombinant mouse IL-6 is fully biologically active when compared to standards. The ED50, as determined by dose-dependent induction of 7TD1 cell proliferation, is 2.4-3.6 pg/mL. Endotoxin Level: Measured by LAL is 0.05 EUs/μg (with a 50% confidence range).

Formulation

Physical State:	Lyophilized
Concentration:	0.1 mg/mL by UV absorbance at 280 nm
Buffer:	0.1% Trifluoroacetic acid
Preservative:	None
Stabilizer:	None
Reconstitution Volume:	100 μL
Reconstitution Buffer:	Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition:	Ambient
Storage Condition:	Store vial at 4° C prior to restoration. Dilute only prior to immediate use. Maintain sterility. This product DOES NOT contain preservative. DO NOT VORTEX. We recommend adding a carrier protein such as HSA or BSA to 0.1% (i.e. 1.0 mg/mL) . For best results aliquot contents and freeze at -20° C or colder. Avoid cycles of freezing and thawing. Centrifuge vial before each opening to dislodge contents from the cap and to clarify if contents are not clear after standing at room temperature.
Expiration:	Expiration date is six (6) months from date of receipt.

Images

SDS-PAGE

SDS-PAGE using Rockland's Recombinant Mouse IL-6 Protein shows bands corresponding to IL-6 (1 μ g) in lane 1 (unreduced, arrowhead) and lane 3 (reduced). Molecular weight estimation was made by comparison to prestained MW markers, lane 2.
