

Datasheet for 010-001-W08-1000**rMouse PDGF-AA Protein****Overview**

Description:	Mouse Platelet Derived Growth Factor AA Recombinant Protein - 010-001-W08-1000
Item No.:	010-001-W08-1000
Size:	1 mg
Applications:	SDS-PAGE, Cellular Assay
Origin:	Mouse
Expressed in:	E. coli

Product Details

Background:	Platelet-Derived Growth Factor (PDGF) is a mitogenic peptide growth hormone carried in the alpha-granules of platelets and is released when platelets adhere to traumatized tissues. Connective tissue cells near the traumatized region respond by initiating the process of replication. The synthesis of PDGF can be induced by IL-1, IL-6, TNF- α , TGF- β and EGF. Recombinant mouse PDGF-AA is a non-glycosylated, disulfide-linked homodimer, containing two 126 amino acid chains, with a total molecular weight of 28.9 kDa.
Synonyms:	PDGF-1, Platelet-derived growth factor A chain, Platelet-derived growth factor alpha polypeptide
Species of Origin:	Mouse
Expressed in:	E. coli
Type:	Recombinant Protein
Low Endotoxin:	Yes

Target Details

Gene Name:	Pdgfa
Purity/Specificity:	platelet Derived Growth Factor AA purity was determined to be greater than 97% as determined by analysis by UV-Spectroscopy at 280nm and by reducing and non-reducing SDS-pAGE.
Relevant Links:	UniProtKB - P20033

Application Details

Tested Applications:	SDS-PAGE
Suggested Applications:	Cellular Assay (Based on references)
Application Note:	Platelet Derived Growth Factor-AA Recombinant Protein has been tested by SDS-PAGE and biological activity and is suitable as a control for polyclonal or monoclonal anti-Platelet Derived Growth Factor-AA in immunological assays.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
Other:	Endotoxin Level: Measured by kinetic LAL analysis and is typically ≤ 1 EU/ μ g protein. Biologic Activity: The activity is determined by the dose-dependent proliferation of Balb/c 3T3 cells and is typically 8-10 ng/mL.

Formulation

Physical State:	Lyophilized
Buffer:	0.1% Trifluoroacetic acid
Preservative:	None
Stabilizer:	None
Reconstitution Volume:	1.0 mL
Reconstitution Buffer:	Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition:	Ambient
Storage Condition:	Store vial at 4° C prior to restoration. Dilute only prior to immediate use. Maintain sterility. This product DOES NOT contain preservative. DO NOT VORTEX. We recommend adding a carrier protein such as HSA or BSA to 0.1% (i.e. 1.0 mg/mL). For best results aliquot contents and freeze at -20° C or colder. Avoid cycles of freezing and thawing. Centrifuge vial before each opening to dislodge contents from the cap and to clarify if contents are not clear after standing at room temperature.
Expiration:	Expiration date is six (6) months from date of receipt.

Images

SDS-PAGE

SDS-PAGE of Mouse Platelet Derived Growth Factor-AA Recombinant Protein. Lane 1: 1 µg Mouse PDGF-AA in non-reducing conditions (-). Lane 2: 1 µg Mouse PDGF-AA in reducing conditions (+). Lane 3: Molecular weight marker. Mouse PDGF AA is a homodimer having a predicted MW totaling 28.9 kDa..

SDS-PAGE

Bioactivity of Mouse Platelet Derived Growth Factor AA Recombinant Protein. Serial dilutions of Mouse PDGF-AA, starting at 100 ng/mL, were added to NIH 3T3 cells. After 40 hours, cell viability was measured and the linear portion of the curve was used to calculate the ED50. The ED50 of Mouse PDGF-AA is 3.4-5 ng/mL. This value is comparable to the typical expected range of 3-5 ng/mL.
