

Datasheet for 010-001-W18-0100**rMouse RELM beta Protein****Overview**

Description:	Mouse RELM beta Recombinant Protein - 010-001-W18-0100
Item No.:	010-001-W18-0100
Size:	150 µg
Applications:	SDS-PAGE
Origin:	Mouse
Expressed in:	E. coli

Product Details

Background:	Resistin-Like Molecule-beta (RELM- β) is a member of a recently identified family of secreted proteins containing conserved cysteines in their C terminus. The RELM family consists of Resistin (also called FIZZ3), RELM-α (FIZZ1), and RELM-γ. Only Resistin and RELM-β have been identified in humans whereas all four RELM family members have been identified in rodents. Recombinant mouse RELM-β is a non-glycosylated protein, containing 83 amino acids, with a molecular weight of 8.9 kDa.
Synonyms:	Cysteine-rich secreted protein A12-beta, Cysteine-rich secreted protein FIZZ2, FIZZ2, RELMbeta
Species of Origin:	Mouse
Expressed in:	E. coli
Type:	Recombinant Protein
Low Endotoxin:	Yes

Target Details

Gene Name:	Retnlb
Purity/Specificity:	RELM beta purity was determined to be greater than 97% as determined by analysis by UV-Spectroscopy at 280nm and by reducing and non-reducing SDS-PAGE.
Relevant Links:	• UniProtKB - Q99P86

Application Details

Tested Applications:	SDS-PAGE
Application Note:	RELM beta Recombinant Protein has been tested by SDS-PAGE and is suitable as a control for polyclonal or monoclonal anti-RELM beta in immunological assays.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
Other:	Endotoxin Level: Measured by kinetic LAL analysis and is typically ≤ 1 EU/ μ g protein. Biologic Activity: A standard activity has not been determined.

Formulation

Physical State:	Lyophilized
Buffer:	0.1% Trifluoroacetic acid
Preservative:	None
Stabilizer:	mannitol
Reconstitution Volume:	100 μ L
Reconstitution Buffer:	Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition:	Ambient
Storage Condition:	Store vial at 4° C prior to restoration. Dilute only prior to immediate use. Maintain sterility. This product DOES NOT contain preservative. DO NOT VORTEX. We recommend adding a carrier protein such as HSA or BSA to 0.1% (i.e. 1.0 mg/mL). For best results aliquot contents and freeze at -20° C or colder. Avoid cycles of freezing and thawing. Centrifuge vial before each opening to dislodge contents from the cap and to clarify if contents are not clear after standing at room temperature.
Expiration:	Expiration date is six (6) months from date of receipt.

Images

**SDS-PAGE**

SDS-PAGE of Mouse RELM beta Recombinant Protein. Lane 1: Molecular weight marker. Lane 2: 1 μ g Mouse Relm beta in non-reducing conditions (-). Lane 3: 1 μ g Mouse Relm beta in reducing conditions (+). Mouse Relm beta is a predicted homodimer with a predicted MW of 18 kDa.
