Mouse IgG Agarose

Overview

Description:	Mouse IgG Whole Molecule Agarose Conjugated - 010-0050
Item No.:	010-0050
Size:	10 mg
Origin:	Mouse

Product Details

Background:	Mouse IgG whole molecule Agarose Conjugated product is made from IgG, secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsonization for phagocytosis. The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc receptor proteins, as well as the F (ab) region possessing the epitope-recognition site. Both heavy and light chains of the antibody molecule are present.
Synonyms:	Mouse IgG Whole Molecule Agarose Conjugate, Mouse IgG Agarose
