

Datasheet for 200-106-231**Sucrose Phosphorylase Antibody Biotin Conjugated****Overview**

Description:	Anti-Sucrose Phosphorylase (E. coli) (GOAT) Antibody Biotin Conjugated (BULK ORDER) - 200-106-231
Item No.:	200-106-231
Size:	10 mg
Reactivity:	E. coli
Host Species:	Goat

Product Details

Background:	Anti-Sucrose Phosphorylase recognizes sucrose phosphorylase, a member of the hexosyltransferases family of enzymes. Sucrose phosphorylase catalyzes the conversion of sucrose to fructose and glucose-1-phosphate both of which can be used in glycolysis, gluconeogenesis, and pentose phosphate pathway. Anti-Sucrose Phosphorylase is suitable for investigators interested in Metabolism, Cancer, and Signal Transduction.
Synonyms:	goat anti-Sucrose Phosphorylase Antibody, biotin Conjugated goat anti-Sucrose Phosphorylase Antibody, Putative sucrose phosphorylase, Sucrose glucosyltransferase
Host Species:	Goat
Conjugate:	Biotin
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	ycjM
Reactivity:	E. coli
Immunogen Type:	Native Protein
Immunogen:	Sucrose Phosphorylase [E.coli]

Purity/Specificity: Anti-Sucrose Phosphorylase antibody is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Biotin, anti-Goat Serum as well as purified and partially purified Sucrose Phosphorylase [E.coli]. Cross reactivity against Sucrose Phosphorylase from other sources is unknown.

Application Details

Application Note: Anti-Sucrose Phosphorylase antibody has been assayed against 1.0 µg of Sucrose Phosphorylase in a standard capture ELISA using Peroxidase Conjugated Streptavidin #S000-03 and ABTS (2,2'-azino-bis-[3-ethylbenthiazoline-6-sulfonic acid]) code # ABTS-100 as a substrate for 30 minutes at room temperature. A working dilution of 1:25,000 to 1:115,000 of the reconstitution concentration is suggested for this product.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

ELISA: 1:5,000 - 1:20,000

IP: 1:100

WB: 1:500 - 1:5,000

Formulation

Physical State: Lyophilized

Concentration: 10.0 mg/mL by UV absorbance at 280 nm

Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Preservative: 0.01% (w/v) Sodium Azide

Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free

Reconstitution Volume: 1.0 mL

Reconstitution Buffer: Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition: Ambient

Storage Condition:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

Images

Western Blot

Rockland Goat anti Sucrose Phosphorylase antibody (200-101-231 lot 7851) was used to detect purified Sucrose Phosphorylase under reducing (R) and non-reducing (NR) conditions. Reduced samples of purified protein contained 4% BME and were boiled for 5 minutes. Samples of ~1ug of protein per lane were run by SDS-PAGE. Protein was transferred to nitrocellulose and probed with 1:3000 dilution of primary antibody (ON 4 C in MB-070). Detection shown was using Dylight 488 conjugated Donkey anti goat (605-741-125 lot 21094 1:10K in TBS/MB-070 1 hr RT). Images were collected using the BioRad VersaDoc System
