Product Details

Background:	Anti-Lactate Dehydrogenase Antibody detects Lactate Dehydrogenase. Lactate dehydrogenases exist in four distinct enzyme classes. Two of them are cytochrome c-dependent enzymes, each acting on either D-lactate or L-lactate. The other two are NAD(P)-dependent enzymes, each acting on either D-lactate or L-lactate. Lactate dehydrogenase catalyzes the interconversion of pyruvate and lactate. Anti-Lactate Dehydrogenase Antibody is ideal for investigators involved in Cell Signaling, Immunology, Neuroscience and Signal Transduction research.
Synonyms:	goat anti-Lactate Dehydrogenase Antibody HRP Conjugation, Peroxidase Conjugated goat anti-Lactate Dehydrogenase Antibody, L-lactate dehydrogenase A chain, LDH-A, LDH muscle subunit, LDH-M
Host Species:	Goat
Conjugate:	Peroxidase (HRP)
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	LDHA
Reactivity:	Rabbit
Immunogen Type:	Native Protein

Immunogen:	Anti-Lactate Dehydrogenase Antibody was produced by repeated immunizations with rabbit muscle Lactate Dehydrogenase full length protein.
Purity/Specificity:	Anti-Lactate Dehydrogenase Antibody is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Peroxidase, anti-Goat Serum as well as purified and partially purified Lactate Dehydrogenase [Rabbit Muscle]. Cross reactivity against Lactate Dehydrogenase from other tissues and species may occur but have not been specifically determined.
