Datasheet for 200-301-F33

GABA-A Receptor delta Antibody

Overview

Description:	Anti-GABA(A) Receptor delta (MOUSE) Monoclonal Antibody - 200-301-F33
Item No.:	200-301-F33
Size:	100 µg
Applications:	IF, WB
Reactivity:	Human, Mouse, Rat
Host Species:	Mouse

Product Details

Background:	The GABA-A receptor is a member of the superfamily of fast acting ligand-gated ion channels. The individual subunits of these receptors have similar sequences and structural features. GABA-A receptors are the major fast inhibitory neurotransmitter gated ion channels in the brain.
Synonyms:	GABAA-RD, Gabrd, MGC105467, Gamma-aminobutyric acid receptor subunit delta, GABA(A) receptor subunit delta
Host Species:	Mouse
Clonality:	Monoclonal
Clone ID:	N151/3
Format:	IgG2a

Target Details

Gene Name:	Gabrd
Reactivity:	Human, Mouse, Rat
Immunogen Type:	Conjugated Peptide
Immunogen:	GABA-A receptor-delta Antibody was produced in mice by repeated immunizations with a synthetic peptide corresponding to an internal region of rat GABA-A-R-Delta.

Purity/Specificity:	Anti-GABA-A receptor delta Antibody was purified by Protein G chromatography. A BLAST analysis was used to suggest cross-reactivity with GABA-A receptor delta from mouse and rat based on 100% homology with the immunizing sequence. No cross-reactivity against GABA-A-R-Beta 2 or –Beta 3. Cross-reactivity with GABA-A receptor delta from other sources has not been determined. Ion Channels research.

Application Details

Tested Applications:	IF, WB
Application Note:	Anti-GABA-A receptor delta Antibody is tested for use in WB and IF microscopy. Expect a band approximately ~55kDa on specific lysates. Specific conditions for reactivity should be optimized by the end user.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1:5000-1:25,000
IF:	1.0-10ug/mL
IHC:	0.1-1.0ug/mL
WB:	1-10ug/mL

Formulation

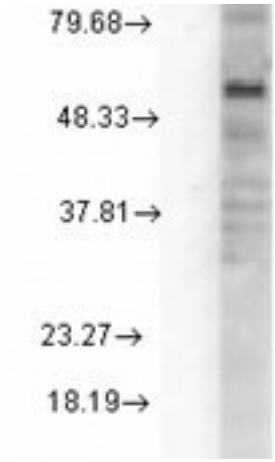

Physical State:	Liquid (sterile filtered)
Concentration:	1.0 mg/mL by UV absorbance at 280 nm
Buffer:	1X PBS, pH 7.4
Preservative:	0.09% (w/v) Sodium Azide
Stabilizer:	50% (v/v) Glycerol

Shipping & Handling

Shipping Condition:	Dry Ice

Storage Condition:	Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

Images

Western Blot
Western Blot of mouse anti-GABA-A Receptor Delta antibody. Lane 1: Rat cell line mix. Load: 15 µg per lane. Primary antibody: GABA-A Receptor Delta antibody at 1:1000 for 2hr at RT. Secondary antibody: Sheep Anti-mouse HRP secondary antibody at 1:10,000 for 60 min at RT. Block: 1.5% BSA for 30 min at RT. Predicted/Observed size: 50.6 kDa, ~53 kDa for GABA-A Receptor Delta. Other band (s): none.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale.
