

Datasheet for 200-301-F95

Kv1.5 K⁺ channel Antibody**Overview**

Description:	Anti-Kv1.5 K ⁺ channel (MOUSE) Monoclonal Antibody - 200-301-F95
Item No.:	200-301-F95
Size:	100 µg
Applications:	IHC, WB
Reactivity:	Human, Mouse, Rat
Host Species:	Mouse

Product Details

Background:	Voltage gated channels are tetrameters composed of four alpha-subunits arranged around a central pore. Each alphasubunit consists of six transmembrane segments with cytoplasmic NH ₂ and COOH-termini. Members of the KV1- KV4 subfamilies generate functional K ⁺ channels in a homotetrameric configuration. The KV2 subfamily consists of KV2.1 and KV2.2, and both have very similar properties. Members of the KV2 subfamily are widely expressed in neuronal tissues. They have also been reported in neurons in the dorsal root ganglia.
Synonyms:	HCK1, HK2, HPCN1, KV1, KCNA5, PCN1, RCK7, RK4, Voltage-gated potassium channel subunit Kv1.5, Potassium voltage-gated channel subfamily A member 5
Host Species:	Mouse
Clonality:	Monoclonal
Clone ID:	S7-45
Format:	IgG1

Target Details

Gene Name:	Kcna5
Reactivity:	Human, Mouse, Rat
Immunogen Type:	Recombinant Protein

Immunogen:	Kv1.5 K ⁺ channel Antibody was produced in mice by repeated immunizations raised against a fusion protein at the cytoplasmic C-terminus region of rat Kv1.5.
Purity/Specificity:	Anti-Kv5.1 K ⁺ channel Antibody was purified by Protein G chromatography. A BLAST analysis was used to suggest cross-reactivity with Kv5.1 K ⁺ channel from mouse, human, and rat based on 100% homology with the immunizing sequence. Cross-reactivity with Kv5.1 K ⁺ channel from other sources has not been determined. Ion Channels research.

Application Details

Tested Applications:	IHC, WB
Application Note:	Anti-Kv5.1 K ⁺ channel Antibody is tested for use in WB, IP, and IHC. Expect a band approximately ~70kDa on specific lysates. Specific conditions for reactivity should be optimized by the end user.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
IF:	1.0-10ug/mL
IHC:	0.1-1.0ug/mL
IP:	User Optimized
WB:	1ug/mL

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	1.0 mg/ml by UV absorbance at 280 nm
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Stabilizer:	50% (v/v) Glycerol

Shipping & Handling

Shipping Condition:	Dry Ice
----------------------------	---------

Storage Condition: Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Expiration: Expiration date is one (1) year from date of receipt.

Images

Immunohistochemistry

Immunohistochemistry of mouse anti-Kv1.5 K⁺ Channel antibody. Tissue: Mouse back skin sections. Primary Antibody: Kv1.5 K⁺ Channel antibody at 1 µg/mL for 1h at RT. Secondary antibody: Peroxidase mouse secondary at 1:10,000 for 45 min at RT. Localization: membrane. Staining: Kv1.5 K⁺ Channel as white signal.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale.
