

Datasheet for 200-301-I24**TLR3 Antibody****Overview**

Description:	Anti-TLR3 (MOUSE) Monoclonal Antibody - 200-301-I24
Item No.:	200-301-I24
Size:	100 µg
Applications:	FC, IF, IHC, IP, WB
Reactivity:	Human
Host Species:	Mouse

Product Details**Background:**

Anti-TLR3 Antibody detects human TLR3. The Toll-like receptor (TLR) family in mammal comprises a family of transmembrane proteins characterized by multiple copies of leucine rich repeats in the extracellular domain and IL-1 receptor motif in the cytoplasmic domain. Like its counterparts in *Drosophila*, TLRs signal through adaptor molecules and could constitute an important and unrecognized component of innate immunity in humans. The TLR family is a phylogenetically conserved mediator of innate immunity that is essential for microbial recognition. TLRs characterized so far activate the MyD88/interleukin-1 receptor-associated kinase (IRAK) signaling pathway. Ten human homologs of TLRs (TLR1-10) have been described. TLR3 cDNA codes for a protein with approximate molecular weight of 120 kDa. TLR3 has a restricted expression pattern being expressed in dendritic cells (DC). TLR3 mRNA expression was detected by in situ hybridization in DC and lymph nodes. The expression of TLR3 in a single cell type may indicate a specific role for this molecule in a restricted setting. Anti-TLR3 Antibody is ideal for investigators involved in cytokines and growth factor research.

Synonyms:	Toll-like receptor 3, CD283
Host Species:	Mouse
Clonality:	Monoclonal
Clone ID:	40C1285.6
Format:	IgG1

Target Details

Gene Name:	TLR3
-------------------	------

Reactivity:	Human
Immunogen Type:	Conjugated Peptide
Immunogen:	TLR3 Antibody was produced in mice prepared by repeated immunizations with a peptide corresponding to internal amino acid sequences in the human protein TLR3.
Purity/Specificity:	Anti-TLR3 Antibody was purified by Protein G chromatography. A BLAST analysis was used to suggest cross-reactivity with Anti-TLR3 from dog, human and mouse based on 100% homology with the immunizing sequence. Cross-reactivity with Anti-TLR3 from other sources has not been determined.
Relevant Links:	• UniProtKB - O15455 • NCBI - NP_003256.1 • GeneID - 7098

Application Details

Tested Applications:	FC, IF, IHC, IP, WB
Application Note:	Anti-TLR3 Antibody is tested for use in WB, Flow, Flow-IC, ICC/IF, IHC, IHC-P, IP, and Bioactivity. Expect a band approximately 120kDa on specific lysates. Specific conditions for reactivity should be optimized by the end user.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
FC:	2-4 µg/10 ⁶ cells
IHC:	10 µg/mL
IP:	2 µg/10 ⁶ cells
WB:	1-3 µg/mL

Formulation

Physical State:	Liquid
Concentration:	1.0 mg/ml by UV absorbance at 280 nm
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.05% (w/v) Sodium Azide

Shipping & Handling

Shipping Condition:	Dry Ice
----------------------------	---------

Storage Condition:	Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

Images

Immunohistochemistry

Immunohistochemistry of mouse Anti-TLR3 antibody.

Tissue A: Human gut lumen (longitudinal section, transverse region) using TLR3. Tissue B: Mouse spleen tissue using isotype control. Tissue C: Mouse spleen tissue using TLR3. Fixation: formalin fixed paraffin embedded. Antigen retrieval: not required. Primary antibody: TLR3 antibody at tissue A at 10 µg/mL and at tissue C at 5 mg/ml for 1 h at RT. Secondary antibody: Peroxidase mouse secondary antibody at 1:10,000 for 45 min at RT. Localization: TLR3 is an endoplasmic reticulum membrane and a single-pass type 1 membrane protein. Staining: TLR3 is precipitated as a red signal with hematoxylin purple nuclear counterstain.

Flow Cytometry

Flow Cytometry of Mouse Anti-TLR3 antibody. Cells: Human monocytes. Stimulation: none. Primary Antibody: Anti-TLR3 antibody at 0.5 ug (red) and isotype control (green). Secondary Antibody: Goat anti-mouse IgG1 PE conjugate (BD).

Western Blot

Western Blot of Mouse Anti-TLR3 antibody. Lane A: untransfected 293. Lane B: 293 cells with human TLR3 cDNA. Lane C: human intestine. Lane D: placenta. Lane E: heart. Lane F: ovary. Primary antibody: TLR3 antibody at 3 µg/mL for overnight at 4°C. Secondary antibody: Goat anti-mouse HRP conjugate at 1:10,000 for 45 min at RT. Block: 5% BLOTTO overnight at 4°C. Predicted/Observed size: 80 kDa for TLR3. Other band(s): none.
