

Datasheet for 200-308-N75**CD86 Phycoerythrin Antibody****Overview**

Description:	Anti-CD86 (MOUSE) Phycoerythrin Conjugated Monoclonal Antibody - 200-308-N75
Item No.:	200-308-N75
Size:	500 µL
Applications:	FC
Reactivity:	Human
Host Species:	Mouse

Product Details

Background:	CD86 is an 80 kD immunoglobulin superfamily member also known as B7-2, B70, and Ly-58. CD86 is expressed on activated B and T cells, monocytes/macrophages, dendritic cells, and astrocytes. CD86, along with CD80, is the ligand of CD28 and CD152 (CTLA-4). CD86 is expressed earlier in the immune response than CD80. CD86 has also been shown to be involved in immunoglobulin class-switching and triggering of NK cell-mediated cytotoxicity. CD86 binds to CD28 to transduce costimulatory signals for T cell activation, proliferation, and cytokine production. CD86 can also bind to CD152, also known as CTLA-4, to deliver an inhibitory signal to T cells.
Synonyms:	T-lymphocyte activation antigen CD86, Activation B7-2 antigen, B70, BU63, CTLA-4 counter-receptor B7.2, FUN-1, CD86, CD28LG2
Host Species:	Mouse
Conjugate:	R-Phycoerythrin (RPE)
Clonality:	Monoclonal
Clone ID:	IT2.2
Format:	IgG2b
F/P Ratio:	1-2

Target Details

Gene Name:	CD86
-------------------	------

Reactivity:	Human
Immunogen:	Anti-CD86 Antibody (Monoclonal) was produced by repeated immunizations with CD86 antigen.
Purity/Specificity:	Phycoerythrin conjugated CD86 Monoclonal Antibody was purified from tissue culture supernatant via affinity chromatography and is directed against human CD86. Reactivity is observed against human CD86. Cross reactivity is observed with Baboon, Capuchin Monkey, Common Marmoset, Cotton-topped Tamarin, Chimpanzee, Cynomolgus, and Rhesus . Reactivity with CD86 from other sources has not been tested. Anti-CD86 is conjugated with PE under optimal conditions and the solution is free of unconjugated PE.

Application Details

Tested Applications:	FC
Application Note:	Anti-CD86 is tested for Flow Cytometry and useful in Immunohistochemistry, and Western Blot. Researchers should determine optimal titers for applications that are not stated.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
FC:	5 uL/test/1x10e5 to 1x10e8 cells
IHC:	User Optimized
WB:	User Optimized

Formulation

Physical State:	Liquid (sterile filtered)
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.09% (w/v) Sodium Azide
Stabilizer:	0.2% BSA (w/v)

Shipping & Handling

Shipping Condition:	Wet Ice
----------------------------	---------

Storage Condition:	Store vial at 4° C prior to opening. Dilute only prior to immediate use. This product is stable at 4° C as an undiluted liquid. Use subdued lighting during handling and incubation of cells prior to analysis. Store reagent in the dark. DO NOT FREEZE.
Expiration:	Expiration date is six (6) months from date of receipt.
