

Datasheet for 200-401-G67**RON Antibody****Overview**

Description:	Anti-RON (RABBIT) Antibody - 200-401-G67
Item No.:	200-401-G67
Size:	100 µg
Applications:	WB
Reactivity:	Human
Host Species:	Rabbit

Product Details

Background:	RON is a member of the protein kinase superfamily. Protein kinases mediate most of the signal transduction in eukaryotic cells, regulating cellular metabolism, transcription, cell cycle progression, cytoskeletal rearrangement and cell movement, apoptosis, and differentiation. RON is a heterodimer composed of an α chain and a β chain. The α chain is completely extracellular, whereas the β chain traverses the cell membrane and contains the intracellular tyrosine kinase and regulatory elements. Anti-RON Antibody is ideal for investigators involved in Cell Signaling, Cancer, Neuroscience and Signal Transduction research.
Synonyms:	rabbit anti-RON antibody, anti-MSP receptor, CDw136, CD136, Macrophage-stimulating protein receptor, p185-Ron, PTK8, RON, Protein-tyrosine kinase 8, c-met-related tyrosine kinase
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	MST1R
Reactivity:	Human
Immunogen Type:	Recombinant Protein
Immunogen:	Anti-RON Antibody was produced in rabbits by repeated immunizations with a recombinant protein produced in Sf9 cells corresponding to the full length human RON protein.

Purity/Specificity:	Anti-RON antibody is directed against human RON. The antibody detects both unphosphorylated and phosphorylated forms of the protein. Anti-RON antibody was purified from rabbit serum by Protein A chromatography and cross adsorption of the GST tag. Cross reactivity with RON from other species has not been determined.
Relevant Links:	• UniProtKB - Q04912 • NCBI - NP_002438.2 • GeneID - 4486

Application Details

Tested Applications:	WB
Application Note:	Anti-RON Antibody has been tested by western blot. Specific conditions for reactivity should be optimized by the end user. Expect a predominant band at ~ 152.3 kDa corresponding to full length protein by western blotting in the appropriate cell lysate or extract.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1:2,000 - 1:10,000
WB:	1:500-1:2000

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	1.0 mg/mL by UV absorbance at 280 nm
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.01% (w/v) Sodium Azide
Stabilizer:	None

Shipping & Handling

Shipping Condition:	Dry Ice
Storage Condition:	Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale.
