

Datasheet for 200-401-N99**Setdb2 Antibody****Overview**

Description:	Anti-SETDB2 (RABBIT) Antibody - 200-401-N99
Item No.:	200-401-N99
Size:	100 µg
Applications:	ELISA, WB
Reactivity:	Human, Mouse
Host Species:	Rabbit

Product Details

Background:	Setdb2 is designed, produced, and validated as part of a collaboration between Rockland and the National Cancer Institute (NCI). Setdb2 and the neighboring gene Phf11 were linked to familial atopy/ asthma and are in a "critical region" commonly deleted in CLL. Setdb2 is a candidate histone methyltransferase as a member of the Su(var) 3-9 family of SET domain-containing enzymes. Other predicted domains in Setdb2 include a methylcytosine binding domain and a large bifurcation domain interrupting the putative histone methyltransferase (SET) domain whose function is unknown. Anti-Setdb2 antibody is ideal for researchers interested in Cancer Research and Epigenetics Research.
Synonyms:	rabbit anti-Setdb2, Histone-lysine N-methyltransferase SETDB2, SET domain bifurcated 2, Setdb 2 antibody, Gm293
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	Setdb2
Reactivity:	Human, Mouse
Immunogen Type:	Recombinant Protein
Immunogen:	Setdb2 antibody was prepared from whole rabbit serum produced by repeated immunizations with a full length protein corresponding to mouse Setdb2.

Purity/Specificity: This Protein A purified antibody is directed against mouse Setdb2. The product was purified from monospecific antiserum by Protein A affinity chromatography. Expect reactivity with Setdb2 from mouse and human sources. Reactivity against homologues from other sources is not known.

Application Details

Tested Applications: ELISA, WB

Application Note: Anti-Setdb2 antibody has been tested for use in ELISA and western blotting. Specific conditions for reactivity should be optimized by the end user. Expect a band approximately 80.6 kDa in size corresponding to Setdb2 by western blotting in the appropriate cell lysate or extract.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

ELISA: 1:2,500 - 1:10,000

WB: 1:10,000 - 1:100,000

Formulation

Physical State: Liquid (sterile filtered)

Concentration: 0.98 mg/mL by UV absorbance at 280 nm

Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Preservative: 0.01% (w/v) Sodium Azide

Stabilizer: None

Shipping & Handling

Shipping Condition: Dry Ice

Storage Condition: Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Expiration: Expiration date is one (1) year from date of receipt.

Western Blot

Western Blot of Rabbit anti-Setdb2 antibody. Lane 1: 50ng recombinant mouse Setdb2. Lane 2: 50ng recombinant mouse Setdb2 + HEK293 50mcg. Lane 3: 5.0ng recombinant mouse Setdb2 + HEK293 50mcg. Lane 4: 0.5ng recombinant mouse Setdb2 + HEK293 50mcg. Lane 5: HEK293 50mcg. Lane 6: 50ng recombinant mouse Setdb2. Lane 7: 50ng recombinant mouse Setdb2 + HEK293 50mcg. Lane 8: 5.0ng recombinant mouse Setdb2 + HEK293 50mcg. Lane 9: 0.5ng recombinant mouse Setdb2 + HEK293 50mcg. Lane 10: HEK293 50mcg. Primary antibody: Setdb2 antibody at 1:100,000 (lanes 1-5) and 1:25,000 (lanes 6-10) for overnight at 4°C. Secondary antibody: HRP rabbit secondary antibody at 1:20,000 for 45 min at RT. Block: 5% BLOTTO overnight at 4°C. Predicted/Observed size: 80.6 kDa for Setdb2. Other band (s): degradation products, proteolysis products, or nonspecific binding.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications.
