

Datasheet for 200-4397S**Avidin Antibody Peroxidase Conjugated****Overview**

Description:	Anti-AVIDIN (RABBIT) Antibody Peroxidase Conjugated - 200-4397S
Item No.:	200-4397S
Size:	25 µL
Applications:	Dot Blot, ELISA, WB
Reactivity:	Avidin
Host Species:	Rabbit

Product Details

Background:	Horseradish Peroxidase (HRP) is an enzyme that utilize organic peroxide compounds as electron donors. Naturally provides protection for plants against pathogens, but can be utilized in molecular biology to convert various substrates to detectable compounds (such as in Western Blotting and ELISAs). Anti-Avidin Antibody is ideal for researchers in Immunology, Cancer, and Microbiology.
Synonyms:	rabbit anti-Avidin Antibody Peroxidase Conjugation, HRP conjugated rabbit anti-Avidin antibody, Avidin Peroxidase, Anti-Avidin HRP Antibody, egg white
Host Species:	Rabbit
Conjugate:	Peroxidase (HRP)
Clonality:	Polyclonal
Format:	IgG

Target Details

Reactivity:	Avidin
Immunogen Type:	Native Protein
Immunogen:	Avidin (Hen Egg White)

Purity/Specificity: Anti-Avidin Antibody Peroxidase Conjugated is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Peroxidase, anti-Rabbit Serum as well as purified and partially purified Avidin [Hen Egg White]. Cross reactivity against Avidin from other sources is unknown.

Application Details

Tested Applications: Dot Blot, ELISA, WB

Application Note: Anti-Avidin Antibody Peroxidase Conjugated has been tested in WB and assayed against 1.0 ug of Avidin [Hen Egg White] in a standard capture ELISA using ABTS (2,2'-azino-bis-[3-ethylbenthiazoline-6-sulfonic acid]) code # ABTS-100 as a substrate for 30 minutes at room temperature. A working dilution of 1:7,000 to 1:27,000 of the reconstitution concentration is suggested for this product. This product can be suitable for ELISA, Western Blot, and Immunohistochemistry.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

ELISA: 1:2,000 - 1:10,000

IHC: 1:250 - 1:1,000

WB: 1:1,000 - 1:2,500

Other: User Optimized

Formulation

Physical State: Liquid (sterile filtered)

Concentration: 1.0 mg/mL by UV absorbance at 280 nm

Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Preservative: 0.01% (w/v) Gentamicin Sulfate. Do NOT add Sodium Azide!

Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free

Shipping & Handling

Shipping Condition: Dry Ice

Storage Condition: Store vial at -20° C or below prior to opening. This vial contains a relatively low volume of reagent (25 µL). To minimize loss of volume dilute 1:10 by adding 225 µL of the buffer stated above directly to the vial. Recap, mix thoroughly and briefly centrifuge to collect the volume at the bottom of the vial. Use this intermediate dilution when calculating final dilutions as recommended below. Store the vial at -20°C or below after dilution. Avoid cycles of freezing and thawing.

Expiration: Expiration date is one (1) year from date of receipt.

Images

Western Blot

Western Blot of Rabbit Anti-Avidin Antibody Peroxidase Conjugated. Lane 1: Molecular Weight Marker. Lane 2: Avidin [0.05µg]. Lane 3: Streptavidin [0.05µg]. Primary Antibody: Anti-Avidin HRP at 1.0µg/mL overnight at 2-8°C. Secondary Antibody: none. Blocking Buffer: BlockOut (p/n MB-073) for 30 mins at RT. Predicted MW: ~17kDa.
