

Datasheet for 200-601-206-0100**Alanine Transaminase Antibody****Overview**

Description:	Anti-Alanine Transaminase (SHEEP) Antibody - 200-601-206-0100
Item No.:	200-601-206-0100
Size:	100 µg
Applications:	WB
Reactivity:	Pig
Host Species:	Sheep

Product Details

Background:	Alanine Transaminase catalyzes the reversible transamination between alanine and 2-oxoglutarate to form pyruvate and glutamate. It participates in cellular nitrogen metabolism and also in liver gluconeogenesis starting with precursors transported from skeletal muscles.
Synonyms:	sheep anti-Alanine Transaminase Antibody, AAT1 antibody, Alanine aminotransferase 1 antibody, alanine aminotransferase antibody, ALT 1 antibody, ALT1 antibody, Glutamic alanine transaminase 1 antibody
Host Species:	Sheep
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	GPT
Reactivity:	Pig
Immunogen Type:	Native Protein
Immunogen:	Alanine Transaminase (ALT) [Pig Heart]

Purity/Specificity: Anti-ALANINE TRANSAMINASE is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Sheep Serum as well as purified and partially purified Alanine Transaminase [Pig Heart]. Cross reactivity against Alanine Transaminase from other sources is unknown.

Application Details

Tested Applications: WB

Application Note: Alanine Transaminase antibody has been tested by western blot and is suitable to be assayed against 1.0 ug of Alanine Transaminase [Pig Heart] in a standard ELISA using Peroxidase conjugated Affinity Purified anti-Sheep IgG [H&L] (Goat) code #611-1302 and (ABTS (2,2'-azino-bis-[3-ethylbenthiazoline-6-sulfonic acid])) code # ABTS-100 as a substrate for 30 minutes at room temperature. A working dilution of 1:2,000 to 1:8,000 of the reconstitution concentration is suggested for this product.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

ELISA: 1:5,000 - 1:25,000

WB: 1:500 - 1:3,000

Formulation

Physical State: Lyophilized

Concentration: 1 mg/mL by UV absorbance at 280 nm

Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Preservative: 0.01% (w/v) Sodium Azide

Stabilizer: None

Reconstitution Volume: 100 µL

Reconstitution Buffer: Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition:	Ambient
Storage Condition:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.
