

Datasheet for 201-401-B77**IL-1F5 Antibody****Overview**

Description:	Anti-Bovine IL-1F5 (RABBIT) Antibody - 201-401-B77
Item No.:	201-401-B77
Size:	100 µg
Applications:	ELISA, WB
Reactivity:	Bovine
Host Species:	Rabbit

Product Details

Background:	Interleukin-1F5 is a recently discovered cytokine which was shown to specifically inhibit the activation of NF-kappaB induced by interleukin 1 family, member 6 (IL1F6) in humans. There is very little published regarding the bovine IL1F5 protein. In the human, this gene and eight other interleukin 1 family genes form a cytokine gene cluster on chromosome 2. Expression of the gene appears to be restricted to various epithelial cell populations. Costelloe et al (2008) have identified SIGIRR [single immunoglobulin domain-containing IL1R-related protein] as a receptor for human IL1F5. Anti-IL-1F5 antibody is ideal for investigators involved in Signal Transduction and Immunology research.
Synonyms:	rabbit anti-IL-1F5 antibody, rabbit anti-Interleukin 1 family, member 5 (Delta)
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	IL1F5
Reactivity:	Bovine
Immunogen Type:	Recombinant Protein
Immunogen:	This protein-A purified antibody was prepared from whole rabbit serum produced by repeated immunizations with a recombinant protein raised in yeast, corresponding to the 155 amino acids of the mature bovine IL-1F5 protein.

Purity/Specificity: This product was Protein-A purified from monospecific antiserum by chromatography. This antibody is specific for bovine IL-1F5 protein. A BLAST analysis was used to suggest cross-reactivity with IL-1F5 from dog, panda, and ferret based on 90-92% homology with the immunizing sequence.

Application Details

Tested Applications: ELISA, WB

Application Note: This protein-A purified Interleukin-1F5 antibody has been tested by ELISA and Western blotting. Specific conditions for reactivity should be optimized by the end user. Expect a band approximately 17.1 kDa in size corresponding to bovine IL-1F5 protein by western blotting in the appropriate cell lysate or extract.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

ELISA: 8,000

WB: 1 µg/mL

Formulation

Physical State: Lyophilized

Concentration: 1.0 mg/mL by UV absorbance at 280 nm

Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Preservative: 0.01% (w/v) Sodium Azide

Stabilizer: None

Reconstitution Volume: 100 µL

Reconstitution Buffer: Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition: Ambient

Storage Condition: Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Expiration: Expiration date is one (1) year from date of receipt.

Western Blot

Western blot using Rockland's Protein-A Purified anti-bovine IL-1F5 antibody shows detection of recombinant bovine IL-1F5 at 17.1 kDa (arrowhead) raised in yeast. The identity of the band at 36 kDa is not known. The protein was purified and resolved by SDS-PAGE, then transferred to PVDF membrane. Membrane was blocked with 3% BSA (BSA-30, diluted 1:10), and probed with 1 µg/mL primary antibody overnight at 4°C. After washing, membrane was probed with IRDye800™ Conjugated Goat Anti-Rabbit IgG (p/n 611-132-122) for 45 min at room temperature.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale.
