

Datasheet for 202-401-311**IL-8 Antibody****Overview**

Description:	Anti-Cat IL-8 (RABBIT) Antibody - 202-401-311
Item No.:	202-401-311
Size:	100 µg
Applications:	WB
Reactivity:	Cat
Host Species:	Rabbit

Product Details

Background:	IL-8 (CXCL8) is a small cytokine belonging to the chemokine CXC subfamily. There have been 17 different CXC chemokines described in mammals. The members of the CXC chemokine subfamily have been subdivided into two categories - those with a specific amino acid sequence of glutamic acid-leucine-arginine (ELR) immediately before the first cysteine of the CXC motif (ELR-positive), and those without an ELR motif (ELR-negative). ELR-positive CXC chemokines specifically induce the migration of neutrophils, and interact with chemokine receptors CXCR1 and CXCR2. IL-8 is an ELR-positive CXC chemokine. The primary function of IL-8 is to recruit neutrophils to the site of inflammation. It also activates neutrophil functions and promotes angiogenesis. Anti-IL8 antibody is ideal for investigators involved in Cancer, Cardiovascular and Immunology research.
Synonyms:	IL8, rabbit anti-IL-8 antibody, rabbit anti-Interleukin-8 antibody, C-X-C motif chemokine 8, CXCL8, Chemokine (C-X-C motif) ligand 8
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	CXCL8
Reactivity:	Cat
Immunogen Type:	Recombinant Protein

Immunogen: This protein A purified antibody was prepared from whole rabbit serum produced by repeated immunizations with a recombinant protein raised in yeast, corresponding to 79 amino acids of mature cat IL-8 protein.

Purity/Specificity: This product was protein A purified from monospecific antiserum by chromatography. This antibody is specific for cat IL-8 protein. A BLAST analysis was used to suggest cross-reactivity with IL-8 from cat sources based on 100% homology with the immunizing sequence. Cross-reactivity with IL-8 from other sources has not been determined.

Application Details

Tested Applications: WB

Application Note: This protein A purified CXCL8 antibody has been tested by Western blotting and is suitable for ELISA. Specific conditions for reactivity should be optimized by the end user. Expect a band approximately 8.9 kDa in size corresponding to cat IL-8 by western blotting in the appropriate cell lysate or extract.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

ELISA: 1:10,000 - 1:50,000

WB: 1:500-1:2,000

Formulation

Physical State: Lyophilized

Concentration: 1.0 mg/mL by UV absorbance at 280 nm

Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Preservative: 0.01% (w/v) Sodium Azide

Stabilizer: None

Reconstitution Volume: 100 μ L

Reconstitution Buffer: Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition:	Ambient
Storage Condition:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

Western Blot

Western blot using Rockland's protein-A purified anti-Cat IL-8 antibody shows detection of recombinant Cat IL-8 at 8.9 kDa, raised in yeast. Primary antibody was diluted to 1 µg/ml. 3% BSA from Rockland's BSA-30 (Bovine Serum Albumin Solution) was used for blocking. Secondary antibody 611-131-122 (Goat anti-Rabbit IgG IRDye® 800) was used at 1:20,000.
