

Datasheet for 209-406-B49

IL-32A Antibody Biotin Conjugated**Overview**

| | |
|----------------------|---|
| Description: | Anti-Human IL-32A (RABBIT) Antibody Biotin Conjugated - 209-406-B49 |
| Item No.: | 209-406-B49 |
| Size: | 100 µg |
| Applications: | ELISA, WB |
| Reactivity: | Human |
| Host Species: | Rabbit |

Product Details

| | |
|----------------------|---|
| Background: | IL-32A (also known as Natural killer cells protein 4, Tumor necrosis factor alpha-inducing factor, IL32 α , Interleukin-32 and IL-32 isoform 4) is a member of the cytokine family. IL-32a is a secreted protein selectively expressed in lymphocytes and plays a role in innate and adaptive immune responses. The protein contains a tyrosine sulfation site, 3 potential N-myristoylation sites, multiple putative phosphorylation sites, and an RGD cell-attachment sequence. Expression of this protein is increased after the activation of T-cells by mitogens or the activation of NK cells by IL-2. This protein induces the production of TNF α and IL-8. It induces typical cytokine pathways of NF- κ B and p38 MAPK. Alternate transcriptional splice variants, encoding different isoforms, have been characterized. |
| Synonyms: | rabbit anti-IL-32A biotin conjugated antibody, rabbit anti-interleukin-32A biotin conjugated antibody, Natural killer cells protein 4, Tumor necrosis factor alpha-inducing factor, IL32 α , Interleukin-32, IL-32 isoform 4 |
| Host Species: | Rabbit |
| Conjugate: | Biotin |
| Clonality: | Polyclonal |
| Format: | IgG |
| F/P Ratio: | 10-20 |

Target Details

| | |
|-------------------|------|
| Gene Name: | IL32 |
|-------------------|------|

| | |
|----------------------------|---|
| Reactivity: | Human |
| Immunogen Type: | Recombinant Protein |
| Immunogen: | This purified antibody was prepared from whole rabbit serum produced by repeated immunizations with full length recombinant human IL-32A protein. |
| Purity/Specificity: | This purified antibody has been heated to 56°C for 30 minutes. In ELISA and other immunoreactive assays, this antibody will recognize both native and recombinant human IL-32A in cell supernatants and certain body fluids. A control of similarly diluted normal rabbit IgG is recommended. |

Application Details

| | |
|-----------------------------|---|
| Tested Applications: | ELISA, WB |
| Application Note: | This purified antibody has been tested for use in ELISA and western blotting. By western blot a band approximately 15 kDa in size corresponding to native human IL-32 α protein is expected in the appropriate cell lysate or extract. Specific conditions for reactivity should be optimized by the end user. |
| Assay Dilutions: | All assays should be optimized by the user. Recommended dilutions (if any) may be listed below. |
| ELISA: | 1:20,000 - 1:100,000 |
| IHC: | 1:1,000-1:5,000 |
| WB: | 1:2,000-1:10,000 |

Formulation

| | |
|-------------------------------|--|
| Physical State: | Lyophilized |
| Concentration: | 1.0 mg/mL by UV absorbance at 280 nm |
| Buffer: | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 |
| Preservative: | 0.01% (w/v) Sodium Azide |
| Stabilizer: | 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free |
| Reconstitution Volume: | 100 μ L |
| Reconstitution Buffer: | Restore with deionized water (or equivalent) |

Shipping & Handling

Shipping Condition: Ambient

Storage Condition: Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Expiration: Expiration date is one (1) year from date of receipt.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale. Suggested uses of our products are not recommendations to use our products in violation of any patent or as a license under any patent of Rockland Immunochemicals, Inc.
