

Datasheet for 307-4202

F(ab')₂ Golden Syrian Hamster IgG (H&L) Antibody Fluorescein Conjugated

Overview

Description:	Rabbit F(ab') ₂ Anti-Golden Syrian Hamster IgG (H&L) Antibody Fluorescein Conjugated - 307-4202
Item No.:	307-4202
Size:	20 mg
Reactivity:	Golden Syrian Hamster
Host Species:	Rabbit

Product Details

Background:	F(ab') ₂ Anti-Golden Syrian Hamster IgG Fluorescein Antibody was generated by enzymatic cleavage and subsequent separation from the Fc fragment. Because of their smaller size, F(ab) ₂ fragments offer several advantages over intact antibodies for use in certain immunochemical techniques and experimental applications. F(ab) ₂ fragments penetrate tissue samples and show better antigen recognition and signal generation in IHC. F(ab) ₂ fragments lack the Fc region and therefore do not bind Fc receptors which effectively lowers background staining. F(ab') ₂ Antibody is ideal for investigators who routinely perform flow cytometry, immunohistochemistry or IHC and other immunoassays.
Synonyms:	Rabbit F(ab') ₂ anti-golden Syrian hamster IgG Antibody fluorescein Conjugated, Rabbit F(ab') ₂ anti-golden Syrian hamster IgG FITC conjugated antibody
Host Species:	Rabbit
Specificity:	IgG (H&L)
Conjugate:	Fluorescein (FITC)
Clonality:	Polyclonal
Format:	IgG F(ab') ₂

Target Details

Reactivity:	Golden Syrian Hamster
Immunogen:	Hamster IgG whole molecule

Purity/Specificity: This product is a F(ab')₂ fragment of an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation, ion exchange chromatography and pepsin digestion followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Fluorescein, anti-Rabbit Serum, Golden Syrian Hamster IgG and Golden Syrian Hamster Serum. No reaction was observed against anti-Rabbit IgG F(c) or anti-Pepsin.

Application Details

Application Note: This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

FC: 1:500 - 1:2,500

FLISA: 1:10,000 - 1:50,000

IF: 1:1,000 - 1:5,000

Formulation

Physical State: Lyophilized

Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Reconstitution Volume: 2.0 mL

Reconstitution Buffer: Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition: Ambient

Storage Condition: Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Expiration: Expiration date is one (1) year from date of receipt.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale.
