Product Details

Background:	The Dynamin-1-like protein (DNM1L) is a member of the dynamin superfamily of GTPases (1). DNM1L mediates mitochondrial and peroxisomal division, and is involved in developmentally regulated apoptosis and programmed necrosis (2). Dysfunction of this gene is implicated in several neurological disorders, including Alzheimer's disease. Mutations in this gene are associated with the autosomal dominant disorder, encephalopathy, lethal, due to defective mitochondrial and peroxisomal fission (EMPF) (3).
Synonyms:	DNM1L Antibody, DLP1, DRP1, DVLP, EMPF, DYMPLE, HDYNIV, DLP1, Dynamin-1-like protein, Dynamin family member proline-rich carboxyl-terminal domain less
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	DNM1L
Reactivity:	Human, Mouse
Immunogen Type:	Conjugated Peptide
Immunogen:	Anti-DNM1L antibody was prepared from whole rabbit serum produced by repeated immunizations with a 19 amino acid peptide near the internal region of human DNM1L.

Purity/Specificity: Anti-DNM1L antibody was affinity purified from monospecific antiserum by immunoaffinity chromatography. DNM1L antibody is human and mouse reactive. At least four isoforms of DNM1L are known to exist; this antibody will detect the two longest isoforms.
