

Datasheet for 600-401-CD8**KCNK13 Antibody****Overview**

Description:	Anti-KCNK13 (RABBIT) Antibody - 600-401-CD8
Item No.:	600-401-CD8
Size:	100 µg
Applications:	ELISA, IF, IHC, WB
Reactivity:	Human, Mouse, Rat
Host Species:	Rabbit

Product Details

Background:	The closely related proteins KCNK13 and KCNK12 (also known as THIK1 and 2) are the first two members of a novel two pore-forming P domains K ⁺ channels subfamily. The pore loop domain, a highly conserved region common to all potassium channels, is involved in determining potassium ion selectivity. Members of this family are all characterized by four transmembrane domains and may function to help influence the resting membrane potential of cells. KCNK13 is expressed mainly in the brain, but is also observed in kidneys. KCNK13 has been suggested to be a candidate for the Cs ⁺ -permeable K ⁺ channel activated by GABA(B) receptors.
Synonyms:	KCNK13 Antibody, THIK1, THIK-1, K2p13.1, Potassium channel subfamily K member 13, Tandem pore domain halothane-inhibited potassium channel 1
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	KCNK13
Reactivity:	Human, Mouse, Rat
Immunogen Type:	Conjugated Peptide
Immunogen:	Anti-KCNK13 antibody was prepared from whole rabbit serum produced by repeated immunizations with a 15 amino acid synthetic peptide near the internal region of human KCNK13.

Purity/Specificity: Anti-KCNK13 Antibody was affinity purified from monospecific antiserum by immunoaffinity chromatography. KCNK13 antibody is predicted to not cross-react with other KCNK protein family members.

Application Details

Tested Applications: ELISA, IF, IHC, WB

Application Note: Anti-KCNK13 Antibody has been tested for use in ELISA, Western Blotting, Immunohistochemistry and Immunofluorescence. Specific conditions for reactivity should be optimized by the end user. Expect a band at approximately 45 kDa in Western Blots of specific cell lysates and tissues.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

ELISA: 1:5,000

IF: 20 µg/mL

IHC: 5 µg/mL

WB: 0.5 µg/mL

Formulation

Physical State: Liquid (sterile filtered)

Concentration: 1.0mg/ml by UV absorbance at 280 nm

Buffer: 0.01 M Sodium Phosphate, 0.25 M Sodium Chloride, pH 7.2

Preservative: 0.02% (w/v) Sodium Azide

Stabilizer: None

Shipping & Handling

Shipping Condition: Dry Ice

Storage Condition: Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Expiration: Expiration date is one (1) year from date of receipt.

Images

Immunofluorescence Microscopy

Immunofluorescence of KCNK13.

Tissue: human brain tissue.

Primary Antibody: KCNK13 antibody at 20 µg/mL.

Immunohistochemistry

Immunohistochemistry of KCNK13.

Tissue: human brain tissue.

Primary Antibody: KCNK13 antibody at 5 µg/mL.

**Western Blot**

Western blot analysis of KCNK13.

Tissue: rat brain tissue lysate.

Primary Antibody: KCNK13 antibody at 0.5 µg/mL in (A) the absence and (B) the presence of blocking peptide.
