Product Details

Background:	Aquaporins selectively conduct water molecules in and out of the cell, while preventing the passage of ions and other solutes. Known as water channels, they are integral membrane pore proteins. Aquaporin 1 is a widely expressed water channel, found in the basolateral and apical plasma membranes of the proximal tubes, the descending loop of Henle and in the descending portion of the vasa recta. Additionally it is found in red blood cells, vascular endothelium, gastrointestinal tract, sweat glands and lungs. It is not regulated by vasopressin.
Synonyms:	AQP1, Water channel protein CHIP29, Aquaporin-CHIP, Water channel protein for red blood cells and kidney proximal tubule, Aquaporin-1, Chip28
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	Aqp1
Reactivity:	Human, Mouse, Rat
Immunogen Type:	Conjugated Peptide
Immunogen:	Aquaporin 1 Antibody was produced from whole rabbit serum prepared by repeated immunizations with a synthetic peptide corresponding to the N-terminal region of rat aquaporin 1.

Purity/Specificity: Anti-Aquaporin 1 Antibody was purified by affinity chromatography. A BLAST analysis was used to suggest cross-reactivity with Aquaporin 1 from Human, Mouse, and Rat based on 100% homology with the immunizing sequence. Other species not yet tested. Cross-reactivity with Aquaporin 1 from other sources has not been determined. Channels and Transporters research.
