

Datasheet for 600-401-EM9**SkiP Antibody****Overview**

Description:	Anti-SkiP (RABBIT) Antibody - 600-401-EM9
Item No.:	600-401-EM9
Size:	100 µg
Applications:	ELISA, IF, IHC, WB
Reactivity:	Human, Mouse, Rat
Host Species:	Rabbit

Product Details

Background:	TGF-beta and the bone morphogenic proteins (BMPs) are key signaling proteins that regulate numerous cellular processes such as embryonic development and tumor genesis. Both signal through the Smad protein family and are negatively regulated by Ski and SnoN, two related proto-oncoproteins. Ski functions by binding to the Smad proteins activated by TGF-beta and the (BMPs) and preventing their phosphorylation, inhibiting their ability to bind DNA and activate the transcription of downstream genes. SkiP was originally identified as a Ski-interacting protein and was later found to augment the signals induced by TGF-beta but inhibit transcription induced by BMP-2 in C2C12 cells, suggesting that SkiP is a key player in the signaling cascades initiated by TGF-beta and the BMP protein family.
Synonyms:	SkiP Antibody, Bx42, SKIP, Prp45, SKIIP, PRPF45, NCOA-62, SNW domain-containing protein 1, Nuclear protein SkiP, FUN20, SKIP1
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	SNW1
Reactivity:	Human, Mouse, Rat
Immunogen Type:	Conjugated Peptide

Immunogen:	Anti-SkiP antibody was prepared from whole rabbit serum produced by repeated immunizations with a 16 amino acid synthetic peptide from near the C-terminus of human SkiP.
Purity/Specificity:	Anti-SkiP Antibody was affinity purified from monospecific antiserum by immunoaffinity chromatography. Cross reactivity with SkiP from other sources has not been determined.
Relevant Links:	• UniProtKB - Q13573 • GeneID - 22938 • NCBI - NP_036377

Application Details

Tested Applications:	ELISA, IF, IHC, WB
Application Note:	Anti-SkiP Antibody has been tested for use in ELISA, Western Blotting, Immunohistochemistry, and Immunofluorescence. Expect a band at approximately 61 kDa in Western Blots using positive control mouse skeletal muscle lysate, human kidney tissue for IF, or other specific cell lysates and tissues. Specific conditions for reactivity should be optimized by the end user.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1:5,000 - 1:10,000
IF:	20 µg/mL
IHC:	20 µg/mL
WB:	0.5 µg/mL

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	1.0 mg/mL by UV absorbance at 280 nm
Buffer:	0.01 M Sodium Phosphate, 0.25 M Sodium Chloride, pH 7.2
Preservative:	0.02% (w/v) Sodium Azide
Stabilizer:	None

Shipping & Handling

Shipping Condition:	Dry Ice
----------------------------	---------

Storage Condition: Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Expiration: Expiration date is one (1) year from date of receipt.

Images

Immunofluorescence Microscopy

Immunofluorescence Microscopy of SkiP antibody. Tissue: Human kidney tissue. Fixation: 0.5% PFA. Antigen retrieval: not required. Primary antibody: SkiP antibody at 20 µg/mL for 1 h at RT. Secondary antibody: Fluorescein rabbit secondary antibody at 1:10,000 for 45 min at RT. Localization: SkiP is nuclear. Staining: SkiP as red fluorescent signal.

Western Blot

Western Blot of SkiP antibody. Lane 1: Mouse skeletal muscle tissue lysate with SkiP at 0.5 µg/mL. Lane 2: Mouse skeletal muscle tissue lysate with SkiP at 1 µg/mL. Load: 35 µg per lane. Secondary antibody: Peroxidase rabbit secondary antibody at 1:10,000 for 45 min at RT. Block: 5% BLOTTO overnight at 4°C. Predicted/Observed size: 61.5 kDa, 57 kDa for SkiP. Other band(s): SkiP splice variants and isoforms.
