

Datasheet for 600-401-FD4**TFPI Antibody****Overview**

Description:	Anti-TFPI (RABBIT) Antibody - 600-401-FD4
Item No.:	600-401-FD4
Size:	100 µg
Applications:	ELISA, IF, IHC, WB
Reactivity:	Human, Mouse, Rat
Host Species:	Rabbit

Product Details

Background:	Tissue factor pathway inhibitor (TFPI), also known as lipoprotein-associated coagulation inhibitor, is a protease inhibitor that regulates the tissue factor (TF)-dependent pathway of blood coagulation (1). TFPI is glycosylated and predominantly found in the vascular endothelium and plasma in both free forms and complexed with plasma lipoproteins. The coagulation process initiates with the formation of a factor VIIa-TF complex, which proteolytically activates additional proteases (factors IX and X) and ultimately leads to the formation of a fibrin clot. TFPI inhibits the activated factor X and VIIa-TF proteases in an autoregulatory loop (1).
Synonyms:	TFPI Antibody, EPI, TFI, LACI, TFPI1, Tissue factor pathway inhibitor, Extrinsic pathway inhibitor, TFPI
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	TFPI
Reactivity:	Human, Mouse, Rat
Immunogen Type:	Conjugated Peptide
Immunogen:	Anti-TFPI antibody was prepared from whole rabbit serum produced by repeated immunizations with a 13 amino acid peptide near the N-terminus of human TFPI.

Purity/Specificity: Anti-TFPI Antibody was affinity purified from monospecific antiserum by immunoaffinity chromatography. TFPI antibody is human, mouse and rat reactive. At least two isoforms of TFPI are known to exist; this antibody will detect both isoforms.

Application Details

Tested Applications: ELISA, IF, IHC, WB

Application Note: Anti-TFPI Antibody has been tested for use in ELISA, Western Blotting, Immunohistochemistry and Immunofluorescence. Specific conditions for reactivity should be optimized by the end user. Expect a band at approximately 35 kDa in Western Blots of specific cell lysates and tissues.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

ELISA: 1:10,000 - 1:20,000

IF: User Optimized

IHC: User Optimized

WB: 1-2 µg/mL

Formulation

Physical State: Liquid (sterile filtered)

Concentration: 1mg/ml by UV absorbance at 280 nm

Buffer: 0.01 M Sodium Phosphate, 0.25 M Sodium Chloride, pH 7.2

Preservative: 0.02% (w/v) Sodium Azide

Stabilizer: None

Shipping & Handling

Shipping Condition: Dry Ice

Storage Condition: Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Expiration:

Expiration date is one (1) year from date of receipt.

Images**Western Blot**

Western blot of TFPI.

Load: rat small intestine tissue lysate.

Primary Antibody: TFPI antibody at 1 μ g/mL.

**Immunohistochemistry**

Immunohistochemistry of TFPI.

Tissue: rat small intestine tissue.

Primary Antibody: TFPI antibody at 5 μ g/mL.

**Immunofluorescence Microscopy**

Immunofluorescence of TFPI.

Tissue: rat small intestine tissue.

Primary Antibody: TFPI antibody at 20 µg/mL.
