Product Details

Background:	The tumor necrosis factor superfamily member TNFSF4 is a type II membrane bound, non-covalently linked homotrimeric protein. It is expressed on antigen presenting cells, such as dendritic cells and activated B-cells, and also on other cells such as vascular endothelial cells, mast cells, and natural killer cells. TNFSF4 signals specifically through the TNFRSF4 receptor, is expressed predominantly on CD4+T cells but also on certain activated CD8+T cells. TNFRSF4/TNFSF4 functions as a costimulatory signal, which is required for a productive interaction between antigen presenting cells and their target T-cells. It enhances cell proliferation and survival, and increases expression of RANTES, IL-2, IL-3, and IFN-gamma. TNFRSF4/TNFSF4 signaling plays an important role in immunotolerance.

Target Details

Gene Name:	TNFSF4
Reactivity:	Human, Mouse, Rat
Immunogen Type:	Conjugated Peptide

Immunogen:	Anti-TNFSF4 antibody was prepared from whole rabbit serum produced by repeated immunizations with a 14 amino acid peptide near the C-terminus of human TNFSF4.
Purity/Specificity:	Anti-TNFSF4 Antibody was affinity purified from monospecific antiserum by immunoaffinity chromatography. At least two isoforms of TNFSF4 are known to exist; this antibody will detect both isoforms.
