Datasheet for 600-401-GD1

ZEB2 Antibody

Overview

Description:	Anti-ZEB2 (RABBIT) Antibody - 600-401-GD1
Item No.:	600-401-GD1
Size:	100 µg
Applications:	ELISA, IF, IHC, WB
Reactivity:	Human, Mouse, Rat
Host Species:	Rabbit

Product Details

Background:	ZEB2, initially identified as Smad interacting-protein 1, is normally located in the nucleus and functions as a DNA-binding transcriptional repressor that interacts with activated SMADs. Like the homologous ZEB1, ZEB2 inhibits the transcription of the E-cadherin gene and induces epithelial-mesenchymal transition, a genetic program controlling cell migration during embryonic development and wound healing, in vitro. ZEB2 can also protect cells from DNA damage-induced apoptosis, suggesting that its expression may contribute to tumor progression. Recent evidence has shown that ZEB2 is often observed in the cytoplasm in numerous cancer tissues, indicating that its localization may be regulated in normal and tumor tissues. Mutations in this gene are also associated with Hirschsprung disease/Mowat-Wilson syndrome.
Synonyms:	ZEB2 Antibody, SIP1, SIP-1, ZFHX1B, HSPC082, SMADIP1, KIAA0569, SIP1, ZFX1B, HRIHFB2411, Zinc finger E-box-binding homeobox 2, Smad-interacting protein 1
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	ZEB2
Reactivity:	Human, Mouse, Rat
Immunogen Type:	Conjugated Peptide

Immunogen:	Anti-ZEB2 antibody was prepared from whole rabbit serum produced by repeated immunizations with an 18 amino acid synthetic peptide near the C-terminus of human ZEB2.
Purity/Specificity:	Anti-ZEB2 Antibody was affinity purified from monospecific antiserum by immunoaffinity chromatography. Due to post-translational modifications, ZEB2 migrates at ~180kDa in SDS-PAGE.
Relevant Links:	• UniProtKB - O60315 • GeneID - 9839 • NCBI - NP_001165124.1

Application Details

Tested Applications:	ELISA, IF, IHC, WB
Application Note:	Anti-ZEB2 Antibody has been tested for use in ELISA, Western Blotting, Immunocytochemistry and Immunofluorescence. Specific conditions for reactivity should be optimized by the end user. Expect a band at approximately 180 kDa in Western Blots of specific cell lysates and tissues.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1:10,000 - 1:20,000
IF:	20 µg/mL
WB:	1-2 µg/mL

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	1 mg/mL by UV absorbance at 280 nm
Buffer:	0.01 M Sodium Phosphate, 0.25 M Sodium Chloride, pH 7.2
Preservative:	0.02% (w/v) Sodium Azide
Stabilizer:	None

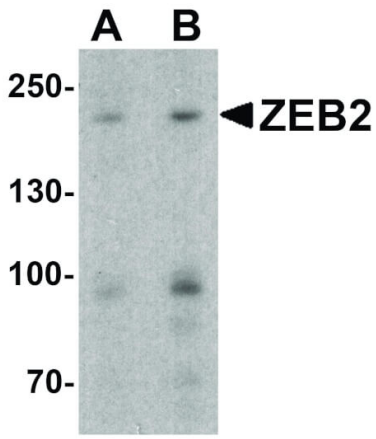
Shipping & Handling

Shipping Condition:	Dry Ice

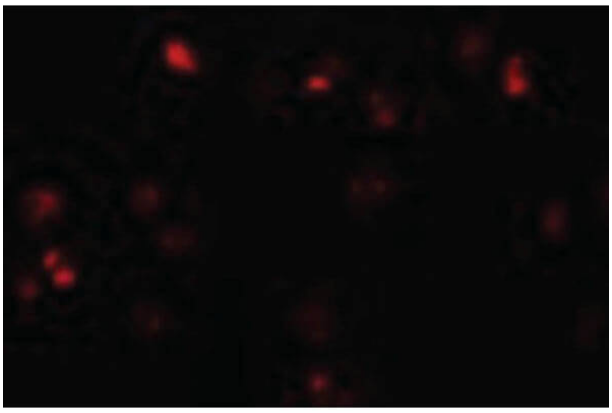
Storage Condition:	Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

Images

Immunohistochemistry
Immunocytochemistry of ZEB2 antibody. Tissue: Jurkat cells. Fixation: formalin fixed paraffin embedded. Antigen retrieval: not required. Primary antibody: ZEB2 antibody at 20 µg/mL for 1 h at RT. Secondary antibody: Peroxidase rabbit secondary antibody at 1:10,000 for 45 min at RT. Staining: ZEB2 as precipitated blue signal with pink nuclear counterstain.



Western Blot
Western Blot of ZEB2 antibody. Lane 1: Jurkat cell lysate with ZEB2 antibody at 1 µg/mL. Lane 2: Jurkat cell lysate with ZEB2 antibody at 2 µg/mL. Secondary antibody: Peroxidase rabbit secondary antibody at 1:10,000 for 45 min at RT. Block: 5% BLOTTO overnight at 4°C.
Predicted/Observed size: 180 kDa, 180 kDa for ZEB2. Other band(s): ZEB2 splice variants and isoforms.



Immunofluorescence Microscopy
Immunofluorescence Microscopy of ZEB2 antibody. Tissue: Jurkat cells. Fixation: 0.5% PFA. Antigen retrieval: not required. Primary antibody: ZEB2 antibody at 20 µg/mL for 1 h at RT. Secondary antibody: Fluorescein rabbit secondary antibody at 1:10,000 for 45 min at RT. Staining: ZEB2 as red fluorescent signal.
