

Datasheet for 600-401-GT3**Orf2 Antibody****Overview**

Description:	Anti-Orf2 (RABBIT) Antibody - 600-401-GT3
Item No.:	600-401-GT3
Size:	100 µg
Applications:	ELISA, WB
Reactivity:	Mouse
Host Species:	Rabbit

Product Details

Background:	Anti-Orf2 Antibody was designed, produced, and validated as part of the Joy Cappel Young Investigator Award (JCYIA). The multi-functional nuclear protein ORF2p is involved in reverse transcriptase and endonuclease processes. ORF2 elements are epigenetically silenced throughout embryonic development and it is suggested that mutations of L1 would result in detrimental de novo insertions into the genome, negatively affecting gene expression. L1 elements are critical components in the mammalian genome, and much is still not known regarding these proteins. Studies implicate that line-1 is activated in fetal oocytes and L1ORF2p may contribute to the eradication or selection of the oocytes.
Synonyms:	Rabbit Anti-Orf2 Antibody, Endonuclease reverse transcriptase, LINE-1 retrotransposable element ORF2 protein, Line1 protein, Orf2p, retrovirus-related Pol polyprotein LINE-1, Long interspersed element-1, L1, Orf-2
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	Pol
Reactivity:	Mouse
Immunogen Type:	Conjugated Peptide

Immunogen:	Affinity purified Anti-ORF2 antibody was prepared from whole rabbit serum produced by repeated immunizations with a synthetic peptide near the c-terminus of mouse ORF2 protein.
Purity/Specificity:	Anti-Orf2 is directed against mouse ORF2 near a c-terminus position. This product is an affinity purified antibody produced by immunoaffinity chromatography using peptide coupled to agarose beads. A BLAST analysis was used to suggest reactivity with this protein from human and feline based on 100% homology for the immunogen sequence.

Application Details

Tested Applications:	ELISA, WB
Application Note:	This affinity purified antibody has been tested for use in ELISA and Western Blot. Specific conditions for reactivity should be optimized by the end user. Expect a band ~150 kDa in size corresponding to Orf2 by western blotting in the liver cell lysates or extract.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1.0 ug/ul
WB:	1.0 ug/ml

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	1.07 mg/mL by UV absorbance at 280 nm
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.01% (w/v) Sodium Azide
Stabilizer:	None

Shipping & Handling

Shipping Condition:	Dry Ice
----------------------------	---------

Storage Condition: Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Expiration: Expiration date is one (1) year from date of receipt.

Western Blot

Western Blot of Rabbit Anti-Orf2 antibody. Lane 1: Mouse liver whole cell lysate (W10-000-T020). Load: 10 µg per lane. Primary antibody: Orf2 antibody at 1.0 µg/mL for overnight at 4°C. Secondary antibody: Gt-a-Rb HRP (p/n 611-103-122) at 1:40,000 for 30 min at RT. Block: MB-070 overnight at 4°C. Predicted/Observed size: 150 kDa for Orf2.
