

Datasheet for 600-401-J94

PPAR gamma phospho S273 Antibody**Overview**

Description:	Anti-PPAR gamma pS273 (RABBIT) Antibody - 600-401-J94
Item No.:	600-401-J94
Size:	50 µg
Applications:	Dot Blot, ELISA
Reactivity:	Human
Host Species:	Rabbit

Product Details

Background:	PPAR has a receptor that binds peroxisome proliferators such as hypolipidemic drugs and fatty acids. The receptor, when activated by ligand, binds to a promotor element in the gene for acyl-CoA oxidase and activates its transcription. In this way it controls the peroxisomal beta-oxidation pathway of fatty acids. It plays a key role in regulating adipocyte differentiation, gut homeostasis, and glucose homeostasis. Anti-PPAR gamma pS273 Antibody is ideal for researchers interested in Metabolism, Cardiovascular or Neuroscience research.
Synonyms:	rabbit anti-PPAR gamma pS273 antibody, Peroxisome proliferator-activated receptor gamma, Nuclear receptor subfamily 1 group C member 3, NR1C3, PPARG, PPAR gamma
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	PPARG
Reactivity:	Human
PTM Specificity:	Phosphorylation
Immunogen Type:	Conjugated Peptide

Immunogen:	Anti-PPAR gamma pS273 affinity purified antibody was prepared from whole rabbit serum produced by repeated immunizations with a synthetic peptide corresponding to the internal region of human PPARG protein.
Purity/Specificity:	Anti-PPAR gamma pS273 was affinity purified from monospecific antiserum by immunoaffinity chromatography and is directed against the phosphorylated form of human PPAR gamma at the S273 residue. A BLAST analysis was used to suggest cross-reactivity with rat, mouse, primate, human, dog, bovine, and pig based on 100% sequence homology. Cross-reactivity with PPAR gamma pS273 from other sources has not been determined.

Application Details

Tested Applications:	Dot Blot, ELISA
Application Note:	Anti-PPAR antibody has been tested by ELISA and dot blot and is useful for Immunohistochemistry and Western Blot. Specific conditions for reactivity should be optimized by the end user. Expect a band approximately ~57kDa corresponding to the appropriate cell lysate or extract.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1: 10,000
IHC:	User Optimized
WB:	1ug/ml

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	0.85 mg/mL by UV absorbance at 280 nm
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.05% (w/v) Sodium Azide
Stabilizer:	None

Shipping & Handling

Shipping Condition:	Dry Ice
----------------------------	---------

Storage Condition:	Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

ELISA

ELISA results of purified Rabbit anti-PPAR gamma pS273 tested against BSA-conjugated non-phospho and phospho forms of immunizing peptide. Each well was coated in duplicate with either 0.1µg of conjugate. The starting dilution of antibody was 5µg/ml and the X-axis represents the Log10 of a 3-fold dilution. This titration is a 4-parameter curve fit where the IC50 is defined as the titer of the antibody. Assay performed using 3% fish gelatin as blocking buffer, Goat anti-Rabbit IgG Antibody Peroxidase Conjugated (Min X Bv Ch Gt GP Ham Hs Hu Ms Rt & Sh Serum Proteins) (p/n 611-103-122) and TMB substrate p/n TMBE-1000.
