

Datasheet for 600-401-MH1**BETA 1 ADRENERGIC RECEPTOR Antibody****Overview**

Description:	Anti-Beta 1 Adrenergic Receptor (RABBIT) Antibody - 600-401-MH1
Item No.:	600-401-MH1
Size:	100 µg
Applications:	ELISA, FC, WB
Reactivity:	Human
Host Species:	Rabbit

Product Details

Background:	The adrenergic beta1 receptor (beta1-adrenoceptor) is a member of the adrenergic receptor group of G-protein-coupled receptors that also includes alpha1A, alpha1B, alpha1D, alpha2A, alpha2B, alpha2C, beta2 and beta3. They are located primarily in the CNS, heart, coronary artery, kidney and muscle. Beta-adrenergic receptors mediate the catecholamine-induced activation of adenylate cyclase through the action of G proteins. This receptor binds epinephrine and norepinephrine with approximately equal affinity. Mediates Ras activation through G(s)-alpha- and cAMP-mediated signaling. Specific polymorphisms in this gene have been shown to affect the resting heart rate and can be involved in heart failure. Anti-Beta 1 Adrenergic Receptor Antibody is useful for researchers interested in cardiac function and G-protein signaling pathways.
Synonyms:	Rabbit Anti-Beta-1 Adrenergic receptor Antibody, Rabbit Anti-Adrenergic β 1R Antibody, Adrenoceptor Beta 1, Adrenergic Beta-1-Receptor, Beta-1 Adrenoreceptor, Beta-1 Adrenoceptor, Adrb1r, B1AR, Beta-1 Adrenergic Receptor, BETA1AR, RHR, Beta-1 adrenergic receptor
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	ADRB1
Reactivity:	Human

Immunogen Type:	Conjugated Peptide
Immunogen:	Anti-Beta 1 Adrenergic Receptor (RABBIT) Antibody was prepared from whole rabbit serum produced by repeated immunizations with a synthetic peptide corresponding to an internal portion of human beta 1 adrenergic conjugated to Keyhole Limpet Hemocyanin (KLH).
Purity/Specificity:	This affinity purified antibody is directed against human beta 1 adrenergic. This product was affinity purified from monospecific antiserum by immunoaffinity purification. A BLAST analysis was used to suggest cross-reactivity with the antigen based on 100% homology with the immunizing sequence to human, mouse, rat, and rhesus macaque.

Application Details

Tested Applications:	ELISA, FC, WB
Application Note:	Anti-Beta 1 Adrenergic Receptor Antibody has been tested in ELISA, WB, and FLOW. Expect a band at ~51kDa in western blot using appropriate lysates. Positive control used: human heart muscle membrane tissues in WB and NCCIT cells in FLOW. Although not tested, this antibody may be suitable in IHC.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1:10,000 - 1:15,000
FC:	1:20
WB:	1:1000
Other:	User Optimized

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	0.97 mg/ml by UV absorbance at 280 nm
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.01% (w/v) Sodium Azide
Stabilizer:	None

Shipping & Handling

Shipping Condition:	Dry Ice
Storage Condition:	Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

Images

Flow Cytometry

Flow Cytometry of Rabbit Anti-Beta 1 Adrenergic Receptor Antibody. Cells: NCCIT cells. Primary Antibody: Beta 1 Adrenergic Receptor Antibody at 5µL in 100µL FACS buffer for 30 mins at RT. Secondary Antibody: Donkey Anti-DyLight™488 (p/n 611-741-127) at 1:400 for 30 mins at RT.

Western Blot

Western Blot of Rabbit Anti-Beta 1 Adrenergic Receptor Antibody. Lane 1: Opal Pre-Stained Molecular Weight Marker (p/n MB-210-0500). Lane 2: Human heart muscle membrane tissue lysate (35ug) [+]. Lane 3: K562 whole cell lysate (35ug) [-] (p/n W09-001-GJ7). Primary Antibody: Anti-Beta 1 Adrenergic Receptor at 1:1000 overnight at 2-8°C. Secondary Antibody: Goat Anti-Rabbit HRP (p/n 611-103-122) at 1:5000 for 30 ins at RT. Buffer: BlockOut (p/n MB-073). Predicted: 51 kDa with some glycosylation. Observed: ~58 kDa.
