

Datasheet for 600-401-X15**Munc18-1 Phospho S241 Antibody****Overview**

Description:	Anti-Munc18-1 pS241 (RABBIT) Antibody - 600-401-X15
Item No.:	600-401-X15
Size:	100 µL
Applications:	WB
Reactivity:	Mouse
Host Species:	Rabbit

Product Details

Background:	Munc-18 (mammalian homologue of Unc-18) is a protein that is thought to be involved in regulating exocytosis due, at least in part, to its ability to bind syntaxin. Munc18-1 is a neuron-specific member of the Sec1/Munc18 protein family that binds to syntaxin1A and is thought to stabilize the complex. The function of Munc18-1 is thought to be regulated by phosphorylation. Munc18-1 pS241 Antibody is ideal for researchers interested in neuroscience research.
Synonyms:	Syntaxin-binding protein 1, Protein unc-18 homolog 1, Unc18-1, Protein unc-18 homolog A, Unc-18A
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	Stxbp1
Reactivity:	Mouse
PTM Specificity:	Phosphorylation
Immunogen Type:	Conjugated Peptide
Immunogen:	Anti-Phospho-Ser241 Munc18-1 Antibody was produced in rabbits by repeated immunizations with a synthetic phospho-peptide corresponding to amino acid residues surrounding Ser241 of mouse Munc-18-1 protein conjugated to KLH.

Purity/Specificity: Anti-Phospho-Ser241 Munc18-1 Antibody is directed against Munc18-1 protein phosphorylated at S421. The antibody was prepared from monospecific antiserum by immunoaffinity chromatography using phospho peptide coupled to agarose beads followed by solid phase adsorption(s) against non-phospho peptide and non-specific peptide to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum. This antibody is specific for phosphorylated Munc18-1. Minimal reactivity occurs against non-phosphorylated Munc18-1. Reactivity against Munc18-1 occurs from mouse sources. However, reactivity is also expected against bovine, canine, chicken, human, non-human primates, rat, sheep based on 100% sequence homology.

Application Details

Tested Applications:	WB
Application Note:	Anti-Phospho-Ser241 Munc18-1 Antibody is tested for Western Blots and is specific for the ~65 kDa Munc18-1 protein phosphorylated at Ser241. Immunolabeling is blocked by the treatment of the lysate with lambda phosphatase (30 minutes, 800 units / 1 mg protein). Specific conditions for reactivity should be optimized by the end user.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1:10,000
WB:	1:1000

Formulation

Physical State:	Liquid (sterile filtered)
Buffer:	0.01 M HEPES, 0.15 M Sodium Chloride, pH 7.5
Preservative:	None
Stabilizer:	0.1 mg/ml Bovine Serum Albumin (BSA) - IgG and Protease free, 50% (v/v) Glycerol

Shipping & Handling

Shipping Condition:	Wet Ice
----------------------------	---------

Storage Condition:	Store vial at -20° C prior to opening in undiluted aliquots. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature.
Expiration:	Expiration date is one (1) year from date of receipt.

Images

Western Blot

Western blot of Anti-Munc18-1 pS241 Antibody.
 Mouse hippocampal lysate showing specific immunolabeling of the ~65 kDa Munc18-1 protein phosphorylated at Ser241 in the first lane (-). Phosphospecificity is shown in the second lane (+) where immunolabeling is completely eliminated by blot treatment with lambda phosphatase (λ -Ptase, 1200 units for 30 min).
