Datasheet for 601-4103

Bovine IgG Fc Antibody

Overview

Description:	Rabbit Anti-Bovine IgG Fc Antibody - 601-4103
Item No.:	601-4103
Size:	2 mg
Applications:	ELISA
Reactivity:	Bovine
Host Species:	Rabbit

Product Details

Background:	Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsonization for phagocytosis. This product possesses the F(c) region, recognized by high-affinity Fc receptor proteins.
Synonyms:	rabbit anti-Bovine IgG F(c) Antibody, Rb-a-Bovine IgG F(c), Bovine IgG F(c) Antibody in Rabbit, Rabbit IgG F(c) Secondary Antibody.
Host Species:	Rabbit
Specificity:	IgG Fc
Clonality:	Polyclonal
Format:	IgG

Target Details

Reactivity:	Bovine
Immunogen Type:	Native Protein
Immunogen:	Anti-Bovine IgG F(c) was produced by repeated immunization with bovine IgG F(c) fragment in rabbit.

Purity/Specificity:	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Bovine IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum, Bovine IgG, Bovine IgG F(c) and Bovine Serum. No reaction was observed against Bovine IgG F(ab).

Application Details

Tested Applications:	ELISA
Application Note:	Anti-Bovine IgG F(c) Antibody has been tested by ELISA and is suitable for immunoblotting (western or dot blot), ELISA, and immunohistochemistry requiring extremely low background levels, lot-to-lot consistency, high titer and specificity.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1:20,000 - 1:100,000
IHC:	1:1,000 - 1:5,000
WB:	1:2,000 - 1:10,000

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	2.0 mg/mL by UV absorbance at 280 nm
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.01% (w/v) Sodium Azide
Stabilizer:	None

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store vial at 4° C prior to opening. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing.
Expiration:	Expiration date is one (1) year from date of receipt.

ELISA

ELISA results of purified Rabbit anti-Bovine IgG F(c) Antibody tested against purified Bovine IgG F(c). Each well was coated in duplicate with 1.0 µg of Bovine IgG F(c) (p/n 001-0103) The starting dilution of antibody was 5µg/ml and the X-axis represents the Log10 of a 3-fold dilution. This titration is a 4-parameter curve fit where the IC50 is defined as the titer of the antibody. Assay performed using 3% fish gelatin as blocking buffer and TMB substrate p/n TMBE-1000.
