

Datasheet for 610-444-040

Mouse IgG1 (Gamma 1 chain) Antibody DyLight™ 680 Conjugated

Overview

| | |
|----------------------|---|
| Description: | Rabbit Anti-Mouse IgG1 (Gamma 1 chain) Antibody DyLight™ 680 Conjugated - 610-444-040 |
| Item No.: | 610-444-040 |
| Size: | 100 µg |
| Reactivity: | Mouse |
| Host Species: | Rabbit |

Product Details

| | |
|----------------------|--|
| Background: | Anti-Mouse IgG1 DyLight 680 Antibody generated in rabbit detects reactivity to Mouse IgG1 (Gamma 1 chain). Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. IgG1 chain constitutes 66% of the IgG subclass and has a high affinity for binding to the Fc receptor of phagocytic cells. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition. |
| Synonyms: | Rabbit Anti Mouse IgG1 (Gamma 1 chain) Antibody DyLight 680™ Conjugated, Rabbit Anti-Mouse IgG1 Antibody DyLight 680™ Conjugated |
| Host Species: | Rabbit |
| Specificity: | IgG1 |
| Conjugate: | DyLight™ 680 |
| Clonality: | Polyclonal |
| Format: | IgG |
| F/P Ratio: | 2.8 |

Target Details

| | |
|--------------------|------------------------|
| Reactivity: | Mouse |
| Immunogen: | Mouse IgG1 heavy chain |

Purity/Specificity: This product was prepared from monospecific antiserum by immunoaffinity chromatography using antigens coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum, Mouse IgG and Mouse Serum. Minimal cross reactivity was noted against other Mouse immunoglobulin classes or subclasses.

Application Details

Application Note: This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. The emission spectra for this DyLight™ conjugate match the principle output wavelengths of most common fluorescence instrumentation.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

FLISA: >1:20,000

IF: >1:5,000

WB: >1:10,000

Formulation

Physical State: Lyophilized

Concentration: 1.0 mg/mL by UV absorbance at 280 nm

Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Preservative: 0.01% (w/v) Sodium Azide

Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free

Reconstitution Volume: 100 µL

Reconstitution Buffer: Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition: Ambient

Storage Condition: Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Expiration: Expiration date is one (1) year from date of receipt.

Images

Western Blot

DyLight™ dyes can be used for two-color Western Blot detection with low background and high signal. Anti-tubulin was detected using a DyLight™ 680 conjugate. Anti-TNF α was detected using a DyLight™ 800 conjugate. The image was captured using the Odyssey® Infrared Imaging System developed by LI-COR.
