

Datasheet for 612-401-D10**Aquaporin 2 phospho S269 Antibody****Overview**

Description:	Anti-Aquaporin 2 pS269 (RABBIT) Antibody - 612-401-D10
Item No.:	612-401-D10
Size:	100 µL
Applications:	IHC, IP, WB
Reactivity:	Rat
Host Species:	Rabbit

Product Details

Background:	Aquaporin 2 antibody recognizes aquaporin 2 (AQP2) which is a hormonally regulated water channel located in the renal collecting duct. Mutations in the AQP2 gene cause hereditary nephrogenic diabetes insipidus in humans. A vasopressin induced cAMP increase results in the phosphorylation of AQP2 at serine-256 and its translocation from the intracellular vesicles to the apical membrane of principal cells. Serine-269 has been recently identified as a vasopressin-mediated phosphorylation site on AQP2 and as such has shown to potentiate plasma membrane retention of AQP2. Anti-Aquaporin 2 pS269 antibody is ideal for investigators involved in Cell Signaling, Neuroscience, Signal Transduction research.
Synonyms:	ADH water channel, Aquaporin-CD, Collecting duct water channel protein, WCH-CD, Water channel protein for renal collecting duct
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	Aqp2
Reactivity:	Rat
PTM Specificity:	Phosphorylation
Immunogen Type:	Conjugated Peptide

Immunogen:	Anti-Aquaporin 2 pS269 Antibody was produced by repeated immunizations with synthetic phospho-peptide corresponding to amino acid residues surrounding Ser269.
Purity/Specificity:	Anti-Aquaporin 2 pS269 Antibody is directed against rat Aquaporin 2 proteins phosphorylated at S269. The antibody was prepared from monospecific antiserum by immunoaffinity chromatography using phospho peptide coupled to agarose beads followed by solid phase adsorption(s) against non-phospho peptide and non-specific peptide to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum. Minimal reactivity occurs against non-phosphorylated Aquaporin 2. Reactivity against Aquaporin 2 occurs from rat sources. However, reactivity is also expected against the following species based on 100% sequence homology: bovine, canine and mouse.

Application Details

Tested Applications:	IHC, IP, WB
Application Note:	Anti-Aquaporin 2 pS269 antibody is tested for use in ICC, IHC, IP, and WB. Specific conditions for reactivity should be optimized by the end user. Expect a band of approximately 29 kDa in size corresponding to AQP2 protein phosphorylated at Ser269 in the appropriate cell lysate or extract. This antibody also recognizes the glycosylated form of aquaporin 2 protein at approximately 37 kDa in size.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1:10,000
WB:	1:1000

Formulation

Physical State:	Liquid
Concentration:	Titred value sufficient to run approximately 10 mini blots.
Buffer:	0.01 M HEPES, 0.15 M Sodium Chloride, pH 7.5
Stabilizer:	0.1 mg/ml Bovine Serum Albumin (BSA) - IgG and Protease free, 50% (v/v) Glycerol

Shipping & Handling

Shipping Condition:	Dry Ice
----------------------------	---------

Storage Condition:	Store vial at -20° C prior to opening. This product is stable at 4° C as an undiluted liquid. For extended storage, aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

Images

Western Blot

Western Blot of Rabbit anti-Aquaporin 2 pS269 antibody.
 Lane 1: rat kidney lysate. Lane 2: rat kidney lysate treated with vasopressin (AVP). Load: 10 µg per lane. Primary antibody: AQP2 antibody at 1:400 for overnight at 4°C. Secondary antibody: IRDye800™ rabbit secondary antibody at 1:10,000 for 45 min at RT. Block: 5% BLOTTO overnight at 4°C. Predicted/Observed size: ~ 29kDa and 37kDa glycosylated form of the AQP2 protein phosphorylated at Ser269. Other band(s): none.
