

Datasheet for 612-401-E22**Rabphilin 3A Phospho S234 Antibody****Overview**

Description:	Anti-Rabphilin 3A pS234 (RABBIT) Antibody - 612-401-E22
Item No.:	612-401-E22
Size:	100 µL
Applications:	WB
Reactivity:	Rat
Host Species:	Rabbit

Product Details

Background:	Rabphilin-3A is a peripheral membrane protein that binds Ca ²⁺ and phospholipids and is attached to synaptic vesicle membranes. The expression of rabphilin 3A is reduced in an animal model of Huntington's disease. Rabphilin can be phosphorylated at Ser234 by both CAM kinase II and PKA and this phosphorylation has been suggested to regulate neuronal activity during development in a synapse-specific manner. Anti-Rabphilin 3A antibody is ideal for investigators involved in Signal Transduction, Cell Signaling, and Neuroscience research.
Synonyms:	Rabphilin 3A Homolog, Rabphilin-3A, RP3A, Rph3A, Exophilin 1, Exophilin-1
Host Species:	Rabbit
Clonality:	Polyclonal
Format:	IgG

Target Details

Gene Name:	Rph3a
Reactivity:	Rat
PTM Specificity:	Phosphorylation
Immunogen Type:	Conjugated Peptide
Immunogen:	Anti-Rabphilin 3A pS234 Antibody was produced in rabbit by repeated immunizations with synthetic phospho-peptide corresponding to amino acid residues surrounding Ser234 conjugated to KLH.

Purity/Specificity: Anti-Rabphilin 3A pS234 antibody is directed against rat rabphilin 3A protein phosphorylated at serine 234. Rabphilin 3A pS234 antibodies are affinity purified from monospecific antiserum by immunoaffinity purification. The immunolabeling of the rabphilin band was completely blocked by the phosphopeptide used as antigen while the dephosphopeptide had no effect on the immunolabeling. Cross reactivity with Rab 3A from other species has not been determined, however, the sequence of the immunogen shows 100% identity to mouse, therefore, cross reactivity is expected.

Application Details

Tested Applications:	WB
Application Note:	Anti-Rabphilin 3A pS234 (Rabbit) antibody is tested for use in Western Blotting and ICC. Specific conditions for reactivity should be optimized by the end user. Expect a band of approximately 82 kDa in size corresponding to rabphilin 3A protein phosphorylated at Ser234 in the appropriate cell lysate or extract.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
IHC:	1:400
WB:	1:1000

Formulation

Physical State:	Liquid
Concentration:	Titred value sufficient to run approximately 10 mini blots.
Buffer:	0.01 M HEPES, 0.15 M Sodium Chloride, pH 7.5
Stabilizer:	0.1 mg/ml Bovine Serum Albumin (BSA) - IgG and Protease free, 50% (v/v) Glycerol

Shipping & Handling

Shipping Condition:	Dry Ice
Storage Condition:	Store vial at -20° C prior to opening. This product is stable at 4° C as an undiluted liquid. For extended storage, aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Dilute only prior to immediate use.

Expiration: Expiration date is one (1) year from date of receipt.

Western Blot

Western Blot of Rabbit anti-Rabphilin 3A pS234 antibody.
 Lane 1: Rat Brain Lysate. Lane 2: None. Load: 10 µg per lane.
 Primary antibody: Rabphilin 3A pS234 antibody at 1:1,000 for overnight at 4°C.
 Secondary antibody: IRDye800™ rabbit secondary antibody at 1:10,000 for 45 min at RT.
 Block: 5% BLOTTO overnight at 4°C.
 Predicted/Observed size: 82 kDa for Rabphilin 3A pS234.
 Other band(s): none.
