

Datasheet for 709-1510

F(ab')₂ Human (kappa chain) Antibody Alkaline Phosphatase Conjugated

Overview

Description:	Goat F(ab') ₂ Anti-Human κ (kappa chain) Antibody Alkaline Phosphatase Conjugated - 709-1510
Item No.:	709-1510
Size:	500 µg
Applications:	ELISA
Reactivity:	Human
Host Species:	Goat

Product Details

Background:	Suitable for immunomicroscopy and flow cytometry or FACS analysis as well as other antibody based fluorescent assays requiring lot-to-lot consistency.
Synonyms:	Goat F(ab') ₂ Anti-Human κ (kappa chain) Antibody Alkaline Phosphatase Conjugation, Goat F(ab') ₂ Anti-Human kappa chain alk phos Conjugated Antibody
Host Species:	Goat
Specificity:	κ (kappa chain)
Conjugate:	Alkaline Phosphatase (AP)
Clonality:	Polyclonal
Format:	IgG F(ab') ₂

Target Details

Reactivity:	Human
Immunogen:	Human kappa light chain

Purity/Specificity:	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Human antigens coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Alkaline Phosphatase and anti-Goat Serum. No reaction was observed against anti-Pepsin or anti-Goat IgG F(c). Specificity was confirmed by ELISA at less than 1% cross reactivity against other human heavy or light chain isotypes.
----------------------------	---

Application Details

Suggested Applications:	ELISA (Based on references)
Application Note:	This product has been assayed against 1.0 µg of Human IgG in a standard capture ELISA using pNPP p-nitrophenyl phosphate code # NPP-10 as a substrate for 30 minutes at room temperature. A working dilution of 1:4,000 to 1:20,000 of the reconstitution concentration is suggested for this product.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1:2,000 - 1:10,000
IHC:	1:200 - 1:1,000
WB:	1:500 - 1:2,500

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	1.0 mg/mL by UV absorbance at 280 nm
Buffer:	0.05 M Tris Chloride, 0.15M Sodium Chloride, 0.001M Magnesium Chloride, 0.0001M Zinc Chloride, 50% (v/v) Glycerol; pH 8.0
Preservative:	0.01% (w/v) Sodium Azide
Stabilizer:	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store vial at 4° C before opening. DO NOT FREEZE. This product is stable at 4° C as an undiluted liquid. Dilute only prior to immediate use. Freezing alkaline phosphatase conjugates will result in a substantial loss of enzymatic activity.

Expiration:

Expiration date is one (1) year from date of receipt.

Images

ELISA

Standard curves generated using the respective human IgG and IgCw-γκ. ELISA data from the right-hand panels were used to plot the log graphs. Human IgG and IgCw-γ with known concentrations were placed in wells coated with goat anti-human IgG/Fc antibody as a capture antibody, and bound Ig molecules were detected with AP-conjugated goat anti-human Cκ antibody F(ab')₂ as a detection antibody. Data are presented as mean ± SD, n = 3. Fig. 4. PMID: 30910358.
