

**Datasheet for KCA215****GFP Chemiluminescent Western Blot Kit****Overview**

<b>Description:</b>	GFP Western Blot Kit: for GFP Chemiluminescent Western Blotting - KCA215
<b>Item No.:</b>	KCA215
<b>Size:</b>	1 Kit
<b>Applications:</b>	WB
<b>Reactivity:</b>	GFP, eGFP, rGFP

**Product Details**

<b>Background:</b>	GFP Chemiluminescent Western Blot Kit allows for the detection of GFP-tagged recombinant proteins present in cell lysates provided by the user. After protein separation by SDS-PAGE and transfer, the membrane is probed with monoclonal Anti-GFP. Detection of the membrane bound antibody-antigen complex is achieved by the addition of a secondary antibody conjugated to the enzyme horseradish peroxidase. The enzyme reacts with a specialized formulation of luminol, an extremely sensitive, non-radioactive substrate that emits light and allows visualization using X-ray film or other imaging methods, including highly sensitive CCD cameras and imaging systems.
<b>Synonyms:</b>	GFP Western Blotting Kit, GFP Chemiluminescent Kit, Green Fluorescent Protein Antibody Kit, Immunoblotting Kit, GFP, rGFP, eGFP
<b>Clonality:</b>	Monoclonal
<b>Clone ID:</b>	9F9.F9
<b>Detection Kit Type:</b>	Chemiluminescent Western Blot Kit

**Target Details**

<b>Reactivity:</b>	GFP, eGFP, rGFP
--------------------	-----------------

**Purity/Specificity:** Rockland Immunochemicals' Chemiluminescent Western Blot Kit for GFP combines all of the necessary reagents with a rapid proven protocol and the extremely high signal detection of our luminol chemiluminescent substrate for the detection of recombinant proteins containing GFP and its variants. The Chemiluminescent Western Blot Kit design includes straightforward procedures and color-coding to allow for ease of use. This kit contains: GFP protein, Mouse IgG control, mouse anti-GFP antibody, anti-mouse IgG peroxidase, Tween-20, BSA, and Femtomax, along with additional supplies and protocol; sufficient substrate for up to 30 mini blots at 7.5 x 8 cm<sup>2</sup> (1,800 cm<sup>2</sup>) and is stable for at least 1 year when stored as indicated.

## Application Details

<b>Tested Applications:</b>	WB
<b>Application Note:</b>	GFP Western Blot Kit is ideal for detection of GFP-tagged recombinant proteins by western blot. The GFP Western Blot kit makes use of Rockland's optimized anti-GFP antibody. The Chemiluminescent GFP Western Blot kit is useful for both western blotting and dot blotting methods. Please read the entire product insert prior to use.
<b>Assay Dilutions:</b>	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
<b>WB:</b>	User Optimized

## Formulation

<b>Physical State:</b>	n/a
<b>Concentration:</b>	n/a
<b>Preservative:</b>	Wash buffers MUST NOT contain SODIUM AZIDE or other inhibitors of peroxidase activity!

## Shipping & Handling

<b>Shipping Condition:</b>	Wet Ice
<b>Storage Condition:</b>	See GFP Western Blot kit insert for complete instructions.
<b>Expiration:</b>	See kit insert for complete instructions.

## Images

**Western Blot**

Western Blot of anti-GFP monoclonal antibody. Lane 1: 64pg of recombinant GFP protein (p/n 000-001-215) were spiked into a HeLa cell-derived lysates (p/n W09-000-364). Lane 2: 32pg of recombinant GFP protein were spiked into a HeLa cell-derived lysates. Lane 3: 16pg of recombinant GFP protein were spiked into a HeLa cell-derived lysates. Lane 4: 8pg of recombinant GFP protein were spiked into a HeLa cell-derived lysates. Lane 5: 4pg of recombinant GFP protein were spiked into a HeLa cell-derived lysates. Lane 6: 2pg of recombinant GFP protein were spiked into a HeLa cell-derived lysates. Lane 7: 1pg of recombinant GFP protein were spiked into a HeLa cell-derived lysates. Lane 8: 0pg of recombinant GFP protein were spiked into a HeLa cell-derived lysates. Primary antibody: anti-GFP monoclonal antibody at 1:400 for overnight at 4°C. Secondary antibody: HRP-conjugated anti-Mouse IgG (p/n 610-4302) was performed at a dilution of 1:20,000 for 1h at 4°C. Block: TTBS (p/n MB-013) supplemented with 1% BSA (p/n BSA-50) for 1 h at 4°C. Predicted/Observed size: 27 kDa for GFP. Other band(s): none.

**Kit Box**

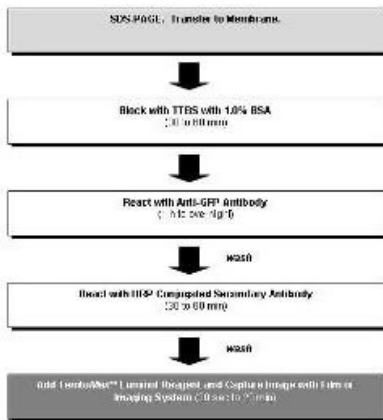

This product is assembled as a kit. See attached protocol or CofA for further details.

### Bottle

Rockland Immunochemicals' Chemiluminescent Western Blot Kit for GFP combines all of the necessary reagents with a rapid proven protocol and the extremely high signal detection of our luminol chemiluminescent substrate for the detection of recombinant proteins containing GFP and its variants. The Chemiluminescent Western Blot Kit design includes straightforward procedures and color-coding to allow for ease of use. This kit contains sufficient substrate for up to 30 mini blots at 7.5 x 8 cm<sup>2</sup> (1,800 cm<sup>2</sup>) and is stable for at least 1 year when stored as indicated.

### Western Blot
