

Datasheet for KOA0109

Ms IgM Alk Phos SABC IHC Detection Kit**Overview**

Description:	Mouse IgM Specific Alk Phos SABC Detection Kit - KOA0109
Item No.:	KOA0109
Size:	1 Kit
Reactivity:	Mus musculus (Mouse)
Host Species:	Goat

Product Details

Background:	Mouse IgM Specific Alkaline Phosphate Streptavidin-Biotin Complex Immunohistochemistry Detection Kit is a streptavidin-biotin immuno-enzymatic antigen detection system. This system involves the sequential incubation of the sample with an unconjugated primary antibody specific to the target antigen, a biotinylated secondary antibody that reacts with the primary antibody, enzyme-labeled streptavidin, and chromogen substrate. Mouse IgM Specific AP/DAB (ABC) detection kit includes reagents specifically designed for the use in the analysis of antigens in IHC and other immunodetection assays. The provided protocol includes immunohistochemical steps for analysis with 5% BSA blocking reagent, biotinylated secondary antibody, an enzyme-labeled streptavidin, and a chromogenic agent.
Synonyms:	Alkaline Phosphatase/3,3'-diaminobenzidine Kit Assay, StreptAvidin-Biotin Complex, Anti-Mouse IgM antibody, Goat Anti-Mouse IgM antibody, colorimetric staining, immunohistochemistry staining
Host Species:	Goat
Conjugate:	Alkaline Phosphatase (AP)
Clonality:	Polyclonal
Detection Kit Type:	Immunohistochemistry Kit

Target Details

Reactivity:	Mus musculus (Mouse)
Relevant Links:	KOA0109 protocol

Application Details

Application Note:	This kit is ready to use and no dilution is needed. See kit insert for details. Useful for Immunohistochemistry.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
IHC:	User Optimized

Formulation

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store at 4°C for 12 months. Avoid freezing. See kit insert for complete instructions.
Expiration:	Expiration date is one (1) year from date of receipt.
