

Datasheet for KOA0110**Ms SABC-FITC IHC Detection Kit****Overview**

Description:	Mouse Specific SABC-FITC Detection Kit - KOA0110
Item No.:	KOA0110
Size:	1 Kit
Applications:	IHC
Reactivity:	Mus musculus (Mouse)
Host Species:	Goat

Product Details

Background:	Mouse IgG Specific Fluorescein Streptavidin-Biotin Complex Immunohistochemistry Detection Kit is a streptavidin-biotin immuno-enzymatic antigen detection system. This system involves the sequential incubation of the sample with an unconjugated primary antibody specific to the target antigen, a biotinylated secondary antibody that reacts with the primary antibody, fluorescein-conjugated streptavidin, and chromogen substrate. Mouse Specific FITC/DAB (ABC) Detection Kit includes reagents specifically designed for the use in the analysis of antigens in IHC and other immunodetection assays. The provided protocol includes steps for high sensitivity analysis with low background using normal goat serum blocking reagent, biotinylated secondary antibody, and a FITC-conjugated streptavidin.
Synonyms:	SABC-FITC Kit Assay, StreptAvidin-Biotin Complex, Fluorescein conjugated antibody, anti-Mouse IgG antibody, Goat anti-Mouse IgG antibody, colormetric staining, immunohistochemistry staining
Host Species:	Goat
Conjugate:	Fluorescein (FITC)
Clonality:	Polyclonal
Detection Kit Type:	Immunohistochemistry Kit

Target Details

Reactivity:	Mus musculus (Mouse)
Relevant Links:	KOA0110 protocol

Application Details

Tested Applications:	IHC
Application Note:	This kit contains concentrated products and will need dilution. See kit insert for details. Useful for Immunohistochemistry. IHC(P): 1:50-200, IHC(F): 1:50-200, ICC: 1:50-200. Optimal dilutions should be determined by end users.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
IHC:	1:50-200

Formulation

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store at 4°C for 12 months. Avoid freezing. See kit insert for complete instructions.
Expiration:	Expiration date is one (1) year from date of receipt.

Images

Immunohistochemistry

Mouse Specific FITC/DAB (ABC) Detection Kit was used for the Immunohistochemistry staining of mouse anti-PCNA Antibody. Paraffin-embedded sections of human intestinal cancer tissues probed with primary antibody Anti-PCNA at 1 µg/mL and developed using secondary antibody FITC Conjugated anti-Mouse IgG SABC.

**Immunohistochemistry**

Mouse Specific FITC/DAB (ABC) Detection Kit was used for the Immunohistochemistry staining of mouse anti-PCK Antibody. Paraffin-embedded sections of human intestinal cancer tissues probed with primary antibody Anti-PCK at 1 µg/mL and developed using secondary antibody FITC Conjugated anti-Mouse IgG SABC.
