

Datasheet for KOA0132**Gt 2 step HRP BAC free IHC Detection Kit****Overview**

Description:	Goat Specific 2 step biotin-free HRP IHC Detection Kit - KOA0132
Item No.:	KOA0132
Size:	1 Kit
Reactivity:	Capra hircus (Goat)
Host Species:	Rabbit

Product Details

Background:	Goat Specific Two Step Biotin-Free Peroxidase Immunohistochemistry Detection Kit includes reagents specifically designed for the analysis of antigens in immunohistochemistry and other immunodetection assays. Using polymerization marking method, HRP is conjugated with secondary antibody to form a large molecule antibody-enzyme polymer. The secondary and third antibodies used in traditional methods can thus be replaced by this enzyme polymer. This enzyme polymer is specially fit for immunohistochemistry analysis due to its powerful nature of amplifying signal and permeating tissues and cells. This kit possesses superiority of high speed, high sensitivity, low background and ease-of-use. The provided protocol includes steps for immunohistochemical analysis of antigens with high sensitivity and low background using an unconjugated primary antibody, peroxidase enzyme polymer, and a 5% BSA blocking reagent.
Synonyms:	HRP Conjugated Assay, HRP Conjugated Goat Kit Assay, peroxidase Conjugated, anti-Goat IgG antibody, Rabbit anti-Goat IgG antibody, immunohistochemistry staining
Host Species:	Rabbit
Conjugate:	Peroxidase (HRP)
Clonality:	Polyclonal
Detection Kit Type:	Chemiluminescent Western Blot Kit

Target Details

Reactivity:	Capra hircus (Goat)
Relevant Links:	KOA0132 protocol

Application Details

Application Note:	This kit is ready to use and no dilution is needed. This kit contains 10mls/kit. Number of tests/kit depends on the size of the sample. 100 test/kit if using 100 μ L/test. See kit insert for details. This kit is useful for Immunohistochemistry.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
IHC:	User Optimized

Formulation

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store at 4°C for 12 months. Avoid freezing. See kit insert for complete instructions.
Expiration:	Expiration date is one (1) year from date of receipt.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation.
