

Datasheet for KOA0406**Mouse CD36 - SR-B3 ELISA Kit****Overview**

Description:	Mouse CD36/SR-B3 AccuSignal ELISA Kit - KOA0406
Item No.:	KOA0406
Size:	1 Kit
Applications:	ELISA
Reactivity:	Mouse
Range:	156 pg/ml - 10000 pg/ml

Product Details

Background:	CD36(Cluster of Differentiation 36) is an integral membrane protein found on the surface of many cell types in vertebrate animals and is also known as FAT, SCARB3, GP88, glycoprotein IV (gpIV) and glycoprotein IIIb(gpIIIb). The human CD36 is a member of a gene family of structurally related glycoproteins and functions as a receptor for collagen type I and thrombospondin. The use of a CD36 genomic probe has allowed the localization of the CD36 locus to the 7q11.2 band by fluorescence in situ hybridization coupled with GTG-banding. CED-1/SCARF1 and C03F11.3/CD36 are beta-glucan binding receptors and define an evolutionarily conserved pathway for the innate sensing of fungal pathogens.
Synonyms:	CD36 antigen, CD36 antigen (collagen type I receptor thrombospondin receptor), CD36 molecule, CD36 molecule (thrombospondin receptor), CHDS7, Cluster determinant 36, FAT, Fatty acid translocase, Glycoprotein IIIb, GP3B, GP4, GPIIB, GPIV, Leukocyte differentiation antigen CD36, PAS 4 protein, PAS IV, PASIV, Platelet collagen receptor, Platelet glycoprotein 4, Platelet glycoprotein IV, SCARB3, Scavenger receptor class B member 3, Thrombospondin receptor
Detection Kit Type:	ELISA Kit
Detection Range:	156 pg/ml - 10000 pg/ml
Sensitivity:	<10 pg/ml

Target Details

Gene Name:	CD36
Reactivity:	Mouse

Immunogen:	Expression system for standard: CHO; Immunogen sequence: G30-K439
Purity/Specificity:	Natural and recombinant mouse CD36. There is no detectable cross-reactivity with other relevant proteins.
Relevant Links:	• UniProtKB - Q08857 • NCBI - NP_001153027.1 • GeneID - 12491 • KOA0406 Protocol

Application Details

Tested Applications:	ELISA
Application Note:	Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 10000pg/ml, 5000pg/ml, 2500pg/ml, 1250pg/ml, 625pg/ml, 312pg/ml, 156pg/ml mouse CD36 standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of mouse cell culture supernates, serum or plasma(heparin, EDTA) to each empty well. It is recommended that each mouse CD36 standard solution and each sample be measured in duplicate.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

Formulation

Anticoagulant:	Heparin Sodium
-----------------------	----------------

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.
Expiration:	See kit insert for complete instructions.
