

Datasheet for KOA0557**Human TNFSF13 - APRIL ELISA Kit****Overview**

Description:	Human TNFSF13/APRIL AccuSignal ELISA Kit - KOA0557
Item No.:	KOA0557
Size:	1 Kit
Applications:	ELISA
Reactivity:	Human
Range:	156 pg/ml - 10,000 pg/ml

Product Details

Background:	Tumor necrosis factor ligand superfamily member 13(TNFSF13) also known as a proliferation-inducing ligand(APRIL) is a protein that in humans is encoded by the TNFSF13 gene. TNFSF13 has also been designated CD256(cluster of differentiation 256). The protein encoded by this gene is a member of the tumor necrosis factor ligand(TNF) ligand family. This protein is a ligand for TNFRSF17/BCMA, a member of the TNF receptor family. This protein and its receptor are both found to be important for B cell development. In vivo experiments suggest an important role for APRIL in the long-term survival of plasma cells in the bone marrow. Mice deficient in April showed a reduced ability to support plasma cell survival In vitro experiments suggested that this protein may be able to induce apoptosis through its interaction with other TNF receptor family proteins such asTNFRSF6/FAS and TNFRSF14/HVEM. Three alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. The TNFSF13 gene lies 878 bp downstream of the TNFSF12 gene on chromosome 17p13.1.
Synonyms:	A proliferation-inducing ligand, APRIL, CD256, TALL-2, TALL2, TNF- and APOL-related leukocyte expressed ligand 2, TNF-related death ligand 1, TNF13_HUMAN, TNFSF13, TRDL-1, Tumor necrosis factor (ligand) superfamily member 13, Tumor necrosis factor ligand superfamily member 13, Tumor necrosis factor like protein ZTNF2, Tumor necrosis factor related death ligand 1, ZTNF2
Detection Kit Type:	ELISA Kit
Detection Range:	156 pg/ml - 10,000 pg/ml
Sensitivity:	<10 pg/ml

Target Details

Gene Name:	TNFSF13
Reactivity:	Human
Immunogen:	Expression system for standard: NSO; Immunogen sequence: A105-L250
Purity/Specificity:	Natural and recombinant human TNFSF13. There is no detectable cross-reactivity with other relevant proteins.
Relevant Links:	• UniProtKB - Q2QBA2 • NCBI - NP_001185551.1 • GeneID - 8741 • KOA0557 Protocol

Application Details

Tested Applications:	ELISA
Application Note:	Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 10000pg/ml, 5000pg/ml, 2500pg/ml, 1250pg/ml, 625pg/ml, 312pg/ml, 156pg/ml human TNFSF13 standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of human cell culture supernates, serum or plasma(heparin, EDTA) to each empty well. It is recommended that each human TNFSF13 standard solution and each sample be measured in duplicate.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	156 pg/ml-10,000 pg/ml
Other:	DOE: 2-8° C - 02/18/2022 -20° C - 08/19/2022

Formulation

Concentration:	1 Kit
Anticoagulant:	Heparin Sodium

Shipping & Handling

Shipping Condition:	Wet Ice
----------------------------	---------

Storage Condition: Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.

Expiration: See kit insert for complete instructions.
