

Datasheet for KOA0728

Human SHBG ELISA Kit**Overview**

Description:	Human SHBG AccuSignal ELISA Kit - KOA0728
Item No.:	KOA0728
Size:	1 Kit
Applications:	ELISA
Reactivity:	Human
Range:	0.031 nmol/l - 2 nmol/l

Product Details

Background:	Sex hormone-binding globulin (SHBG) or sex steroid-binding globulin (SSBG) is a glycoprotein that binds to the two sex hormones: androgen and estrogen. The gene for SHBG is located on chromosome 17 on the short arm between the bands 17p12→p13. And this gene encodes a steroid binding protein that was first described as a plasma protein secreted by the liver but is now thought to participate in the regulation of steroid responses. The encoded protein transports androgens and estrogens in the blood, binding each steroid molecule as a dimer formed from identical or nearly identical monomers. Polymorphisms in this gene have been associated with polycystic ovary syndrome and type 2 diabetes mellitus. Alternative splicing results in multiple transcript variants.
Synonyms:	ABP, Androgen binding protein, SBP, Sex hormone-binding globulin, Sex steroid binding protein, Sex steroid-binding protein, SHBG, SHBG_HUMAN, TeBG, Testis specific androgen binding protein, Testis-specific androgen-binding protein, Testosterone binding beta globulin, Testosterone estradiol binding globulin, Testosterone estrogen binding globulin, Testosterone-estradiol-binding globulin, Testosterone-estrogen-binding globulin
Detection Kit Type:	ELISA Kit
Detection Range:	0.031 nmol/l - 2 nmol/l
Sensitivity:	<0.001 nmol/l

Target Details

Gene Name:	SHBG
Reactivity:	Human

Immunogen:	Expression system for standard: NSO; Immunogen sequence: L30-H402
Purity/Specificity:	Natural and recombinant human SHBG. There is no detectable cross-reactivity with other relevant proteins.
Relevant Links:	• UniProtKB - P04278 • NCBI - NP_001031.2 • GenelD - 6462 • KOA0728 Protocol

Application Details

Tested Applications:	ELISA
Application Note:	Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 2nmol/L, 1nmol/L, 0.5nmol/L, 0.25nmol/L, 0.125nmol/L, 0.062nmol/L, 0.031nmol/L human SHBG standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of human cell culture supernates, serum and plasma(heparin, EDTA) to each empty well. It is recommended that each human SHBG standard solution and each sample be measured in duplicate.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

Formulation

Anticoagulant:	Heparin Sodium
-----------------------	----------------

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.
Expiration:	See kit insert for complete instructions.
