

Datasheet for KOA0732**Mouse FOLR1 ELISA Kit****Overview**

Description:	Mouse FOLR1 AccuSignal ELISA Kit - KOA0732
Item No.:	KOA0732
Size:	1 Kit
Applications:	ELISA
Reactivity:	Mouse
Range:	46.9 pg/ml - 3000 pg/ml

Product Details

Background:	Folate receptor 1 adult is a protein that in humans is encoded by the FOLR1 gene. The protein encoded by this gene is a member of the folate receptor(FOLR) family. It is mapped to 11q13.4. FOLR1 expression in Jurkat cells facilitated MBG or EBO entry, and FR-blocking reagents inhibited infection of MBG or EBO. This gene product is a secreted protein that either anchors to membranes via a glycosyl-phosphatidylinositol linkage or exists in a soluble form. The FOLR1 gene encodes the adult folate receptor, or folate-binding protein(FBP), which has a high affinity for folic acid and for several reduced folic acid derivatives, and mediates delivery of 5-methyltetrahydrofolate to the interior of cells. FOLR1 is also an important regulator of milk protein synthesis.
Synonyms:	Adult folate binding protein, Adult folate-binding protein, FBP, Folate Receptor 1 Adult, Folate receptor 1, Folate Receptor 1 Precursor, Folate receptor adult, Folate receptor alpha, Folate receptor, FOLR, FOLR1, FOLR1_HUMAN, FR alpha, FR-alpha, FRalpha, KB cells FBP, MOV18, Ovarian cancer associated antigen, Ovarian tumor associated antigen, Ovarian tumor associated antigen MOV18, Ovarian tumor-associated antigen MOV18
Detection Kit Type:	ELISA Kit
Detection Range:	46.9 pg/ml - 3000 pg/ml
Sensitivity:	<10 pg/ml

Target Details

Gene Name:	FOLR1
Reactivity:	Mouse

Immunogen:	Expression system for standard: E.coli; Immunogen sequence: T25-S232
Purity/Specificity:	Natural and recombinant mouse FOLR1. There is no detectable cross-reactivity with other relevant proteins.
Relevant Links:	• UniProtKB - P35846 • NCBI - NP_001239481.1 • GenelD - 14275 • KOA0732 Protocol

Application Details

Tested Applications:	ELISA
Application Note:	Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 3000pg/ml, 1500pg/ml, 750pg/ml, 419pg/ml, 187.5pg/ml, 93.8pg/ml, 46.9pg/ml mouse FOLR1 standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of mouse cell culture supernatants, serum or plasma (heparin, EDTA) to each empty well. We recommend that each mouse FOLR1 standard solution and each sample is measured in duplicate.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

Formulation

Anticoagulant:	Heparin Sodium
-----------------------	----------------

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.
Expiration:	See kit insert for complete instructions.
