

Datasheet for KOA0757**Rat RANK ELISA Kit****Overview**

Description:	Rat RANK AccuSignal ELISA Kit - KOA0757
Item No.:	KOA0757
Size:	1 Kit
Applications:	ELISA
Reactivity:	Rat
Range:	62.5 pg/ml - 4000 pg/ml

Product Details

Background:	Receptor Activator of Nuclear Factor κ B (RANK), also known as TRANCE Receptor, is a type I membrane protein that is expressed on the surface of osteoclasts and is involved in their activation upon ligand binding. RANK is a recently described TNF receptor family member, and its ligand, RANKL, promote survival of dendritic cells and differentiation of osteoclasts. RANK contains 383 amino acids in its intracellular domain(residues 234-616), which contain three putative TRAF-binding domains(termed I, II, and III). RANK interacts with various TRAFs through distinct motifs and activates NF- κ B via a novel TRAF6 interaction motif, which then activates NIK, thus leading to NF- κ B activation, whereas RANK most likely activates JNK through a TRAF2-interacting region in RANK. The standard in this kit is recombinant human RANK with the sequence of Q29-G213 aa. It is a dipolymer which compose of two chains, and the molecular weight of each is 48kda.
Synonyms:	CD265, FEO, LOH18CR1, Loss of heterozygosity 18 chromosomal region 1, ODFR, OFE, OPTB7, Osteoclast differentiation factor receptor, OSTs, PDB2, Receptor activator of NF- κ B, Receptor activator of nuclear factor kappa B, TNFRSF11A, TNFR11_HUMAN, TRANCER, Tumor necrosis factor receptor superfamily member 11A, Tumor necrosis factor receptor superfamily member 11a activator of NF κ B, Tumor necrosis factor receptor superfamily member 11a NF κ B activator
Detection Kit Type:	ELISA Kit
Detection Range:	62.5 pg/ml - 4000 pg/ml
Sensitivity:	<10 pg/ml

Target Details

Gene Name: TNFRSF11A

Reactivity:	Rat
Immunogen:	Expression system for standard: NSO; Immunogen sequence: Q30-P213
Purity/Specificity:	Natural and recombinant rat RANK. There is no detectable cross-reactivity with other relevant proteins.
Relevant Links:	• UniProtKB - F1M8Z6 • NCBI - NP_001258164.1 • GeneID - 498206 • KOA0757 Protocol

Application Details

Tested Applications:	ELISA
Application Note:	Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 4000pg/ml, 2000pg/ml, 1000pg/ml, 500pg/ml, 250pg/ml, 125pg/ml, 62.5pg/ml rat RANK standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of rat cell culture supernates or serum to each empty well. It is recommended that each rat RANK standard solution and each sample be measured in duplicate.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

Formulation

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.
Expiration:	See kit insert for complete instructions.
