

Datasheet for KOA0813**Human JAM-A ELISA Kit****Overview**

Description:	Human JAM-A AccuSignal ELISA Kit - KOA0813
Item No.:	KOA0813
Size:	1 Kit
Applications:	ELISA
Reactivity:	Human
Range:	46.9 pg/ml - 3000 pg/ml

Product Details

Background:	Junctional adhesion molecule A(JAM-A) is a protein that in humans is encoded by the F11R gene. It is mapped to 1q23.3. This gene is an immunoglobulin-like molecule that colocalizes with tight junctions in endothelium and epithelium and is also found on blood leukocytes and platelets. JAM-A plays an important role in the regulation of tight junction assembly in epithelia. In addition, it can act as a receptor for reovirus, a ligand for the integrin LFA1, involved in leukocyte transmigration, and a platelet receptor. JAM-A has a nonredundant role in controlling DC motility, trafficking to lymph nodes, and activation of specific immunity.
Synonyms:	CD 321, CD321, CD321 antigen, ESTM33, F11 receptor, F11R, JAM 1, JAM A, JAM, JAM-1, JAM-A, JAM1, JAM1_HUMAN, JAMA, JCAM, Jcam1, Junction adhesion molecule 1, Junction adhesion molecule mouse homolog of, Junctional adhesion molecule 1, Junctional adhesion molecule A, KAT, Ly106, PAM 1, PAM-1, PAM1, Platelet adhesion molecule 1, Platelet adhesion molecule, Platelet F11 receptor, PRO301, UNQ264, UNQ264/PRO301
Detection Kit Type:	ELISA Kit
Detection Range:	46.9 pg/ml - 3000 pg/ml
Sensitivity:	<10 pg/ml

Target Details

Gene Name:	F11R
Reactivity:	Human
Immunogen:	Expression system for standard: E.coli; Immunogen sequence: S28-V238

Purity/Specificity: Natural and recombinant human JAM-A. There is no detectable cross-reactivity with other relevant proteins.

Application Details

Tested Applications: ELISA

Application Note: Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 3000pg/ml, 1500pg/ml, 750pg/ml, 419.pg/ml, 187.5pg/ml, 93.8pg/ml, 46.9pg/ml human JAM-A standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of human cell culture supernatants or serum to each empty well. We recommend that each human JAM-A standard solution and each sample is measured in duplicate.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

ELISA: 46.9pg/ml-3000pg/ml

Other: DOE:
10/03/19 at 2-8°C
04/20/20 at -20°C

Formulation

Concentration: 1 Kit

Shipping & Handling

Shipping Condition: Wet Ice

Storage Condition: Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.

Expiration: See kit insert for complete instructions.
