

Datasheet for MB-016**3.0 M Sodium Acetate****Overview**

Description:	3.0 M Sodium Acetate pH 5.2 DEPC Treated - MB-016
Item No.:	MB-016
Size:	100 mL

Product Details

Background:	Sodium acetate is the conjugate base of a weak acid. Solution of sodium acetate and acetic acid can act as a buffer to keep a relatively constant pH. This is useful especially in biochemical applications where reactions are pH dependent.
Synonyms:	Sodium Ethanoate, NaOAc

Target Details

Purity/Specificity:	This product was aseptically filtered through a Millipore 0.22 micron filter into clean, pre-sterilized containers. The product was tested on trypticase soy agar for 24 hours, 48 hours and 72 hours and was found to be negative for bacteria.
Relevant Links:	MB-016 SDS

Application Details

Application Note:	Sodium Ethanoate is a concentrated stock solution and should be diluted appropriately with distilled, deionized water or equivalent to its final working concentration. This buffer contains 3.0 M Sodium Acetate at pH 5.2 meticulously prepared using ultra pure reagents dissolved in highly polished pharmaceutical grade deionized water. Visit our newly expanded web site at www.rockland.com for methods using this and other buffers.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

Formulation

Physical State:	Liquid (sterile filtered)
------------------------	---------------------------

Concentration:	3.0 M
Buffer:	See application note.
Preservative:	None
Stabilizer:	None

Shipping & Handling

Shipping Condition:	Ambient
Storage Condition:	Store container at room temperature (18° to 26° C) prior to opening.
Expiration:	Expiration date is six (6) months from date of receipt.
