

Datasheet for MB-058

1X TES pH 7.8

Overview

Description:	1X TES pH 7.8 (10 mM Tris HCl, 100 mM NaCl, 1 mM EDTA) DEPC Treated - MB-058
Item No.:	MB-058
Size:	1 L

Product Details

Background:	1X TES pH 7.8 DEPC TREATED - TES buffer is a commonly used buffer solution in molecular biology, especially in procedures involving DNA or RNA. TES buffer is useful to stabilize proteins, DNA, or RNA, while protecting it from degradation.
Synonyms:	1X TES Buffer pH 7.8

Target Details

Purity/Specificity:	This product was aseptically filtered through a Millipore 0.22 micron filter into clean, pre-sterilized containers. The product was tested on trypticase soy agar for 24 hours, 48 hours and 72 hours and was found to be negative for bacteria.
Relevant Links:	MB-058 SDS

Application Details

Application Note:	This product is ready-to-use as a working 1X solution and requires no further dilution. This buffer consists of 10 mM Tris HCl, 100 mM NaCl, and 1.0 mM EDTA at a pH of 7.8. Meticulously prepared using ultra pure reagents dissolved in DEPC treated pharmaceutical grade deionized water.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

Formulation

Physical State:	Liquid (sterile filtered)
-----------------	---------------------------

Concentration:	1X
Buffer:	See application note.
Preservative:	None
Stabilizer:	None

Shipping & Handling

Shipping Condition:	Ambient
Storage Condition:	Store container at room temperature (18° to 26° C) prior to opening. If desired, the solution may be stored at 4° C or less. Some salts may precipitate out of solution at lower temperature. Allow buffer to equilibrate to room temperature (18° to 26° C) to restore solubility of some salts.
Expiration:	Expiration date is six (6) months from date of receipt.
